Thread: [USD profits vs BTC Profits Analysis](#)

Yungversace - December 16, 2017, 10:31 pm

I got out of some of my alts and did some analysis.

The results are shocking even after 3.4k % profits, 3k % loss in btc. and overall loss.

Yeah I figured out, updated.

StuffSneak - December 16, 2017, 10:37 pm

Yeah same thing happened to me. All my Investments are around 400-700%+ up but still if I had just kept BTC, profits would have been better.

Jin Goddo - December 16, 2017, 10:40 pm

Which is why the main goal is to increase your BTC while you trade, rather than just try to increase the USD value.

But still, profit is profit.

EziNet - December 16, 2017, 11:15 pm

2017 noob crypto trader problem.

Covalent - December 16, 2017, 11:27 pm

So I guess the best thing to do is just invest in bitcoin and watch it goto the moon.
(instead of alts)
