Thread: [Any group looking for a video editor?](#)

Fortunate - December 17, 2017, 8:29 am

I'm a video editor and I'm looking for projects to be a part in.

If any group is looking for a video-editor for pretty much anything =]
I work for free for small projects as I enjoy doing them in my past time. For an example. memes, montages, edits or advertisements.

Let me know. PM me for a showcase of my work.

Do you do motion graphic explanor videos

Omtism - December 17, 2017, 7:41 pm

I need a tutorial on how to do Minecraft dependencies in eclipse.

I'm not an expert in animating but I do small projects. They also take time so I'd rather not do them for free.

Yea, I can support this notion.

Fortunate - December 18, 2017, 10:59 pm

I am still offering free video-editor for a group. Let me know if you have any projects you need help with or just want me to meme around.

They take a longer time for me as I mostly work with Sony Vegas. I do work with Adobe projects but my knowledge is limited.

You should definitely step it up to After Effects. I used to do heavy motion graphics, and like you, I too started off in Vegas Pro. When I started to feel more advantageous, I began to increase my familiarity with C4D and Zbrush. I'd do my modeling work in Zbrush then transfer it to C4D where I'd do the motion implementations. This is an amazing route if you ever feel like getting more serious about it.

I'm thinking about it, but I barely have time or motivation to keep studying/learning better ways to do motion graphics. I know the basics but it's just faster to do everything on SV.

Thanks for the comment, appreciate it ? I'll put thought into it.

I'm afraid I have edited those for a person here on HF before and I laugh every time I make them since they're so ironical.

We are looking for a video editor for our YouTube hacking tutorial series.

I'm still in the market for any group out there.

Let me know if you have any need for an editor

Well actually I've been looking to hire someone full time for about 50x 1-10 minute motion graphic videos but I guess you don't want a job.

Oh and that whole thing that I own a group on here... I think Dredd knows the one, he got banned from it for being an annoying ginger.

If you're looking for a "full time" motion graphic video designer then you are looking for the wrong person anyway.

I already have a full-time job, just looking for small projects that I can spend my lonely nights with and possibly improve.

Fortunate - December 27, 2017, 9:59 am

If anyone has need for a cool video-editor hit me up.

I currently have a few hours to do nothing.

Poseidon - December 28, 2017, 8:31 pm

Hey OP, I'm very interested in seeing some of your video editing skills. Do you have any material that you'd be willing to share either here or via PM?

Sure if you're interested in paid work. I'll PM you once I upload my 2017 reel.

Fortunate - January 4, 2018, 2:54 am

If you're interested in a chill video-editor for your group, contact me.

Lukas - January 4, 2018, 8:52 am

Do you have any examples of your work?

Fortunate - September 3, 2018, 2:41 am

I am still open for group requests.

I can make a video application if needed. PM me for work if you're interested.

We (non-official group) are looking for a video editor for our YouTube series. We already have teaser/traler made alongside an intro which was made for free for us. All we would need from you would be some pretty basic stuff, nothing fancy, although possibly time consuming. It'd primarily just be a case of A/V Syncing and adding the odd special effect or two here or there. We can pay, and on top of that, you'll get a cut of the ad revenue once our YouTube gets big enough to allow us to profit from ads.

I've just noticed your signature saying you do graphics too - we are desperately in need of graphics

for an education platform that we are building. Are you capable of making your own custom animated GIF's? Would you be able to make an oldschool hacker/cyberpunk style theme? Also, would you be able to create graphics that replicated BBS ANSI Art? We aren't asking for actual ANSI art here (that would be a nightmare), but rather just photoshops done to recreate the art style of BBS ANSI.

mrpizzahut - September 5, 2018, 1:08 am

Video editor? Are you starting a news station?

Fortunate - September 5, 2018, 5:12 am

(Sep 5, 2018 01:08 AM)mrpizzahut Wrote: [\[CITE\]](#) Video editor? Are you starting a news station? Aren't you familiar with the term? Video editing is the process of piecing together video clips, images, and sounds to create a movie. Nowadays, this is usually done on a computer with fancy video editing programs called non-linear editors, or NLE's.

Seems like a bit of a big of cake for me. I'm looking for smaller projects within official groups, since bigger projects do not fit my schedule. I am studying 24/7 after all.

I am available for paid work though, so if you're interested in any of the jobs you mentioned, let me know.

Best way to find work in a field like that would be to develop a show reel to display your talents unless you wish to keep that part of your life private.

I can see that. There's no point in giving tips if I am already doing it.

Just updated the OP with some projects I've done for HF. Those are projects requested to be in a specific style. I can adapt.

EDIT: Apparently you can't edit OP's...
