Try to only have 1 goal, to get them to pay. Don't start a conversation with the on how you are and stuff. Just try to get them to buy, for instance, if they message you, ask if they want to buy. Next ask if they can pay with your payment method and then send them the details of where to pay to. If you do this it will be much easier ?

P.S. Always be friendly, if they don't buy just ignore them and don't get mad at them. Maybe they will change their mind and buy.

Want to try it but I have one question.

Can I exchange the gift cards for bitcoin or paypal from gift card balance after redeeming them or will I need to keep them unclaimed?

You can use a service called [purse.io](#) if you redeemed it, but you will receive your bitcoin after they received their order. It's better to keep them unclaimed so you can sell them.

Used snapchat++ and instagram++ for like 20 minutes and then the app crashed and they wouldnt work, deleted them and tried to reinstall and everytime it kept saying "couldnt download right now".

Its almost like my iphone banned me from downloading them wtf lol
