Thread: [Thread Options Selling for \\$45 \[HOT\] Easy AFK Bitcoin Method No BS](#)

BlobbyPixel - December 19, 2017, 2:25 am

So there is a method to mine bitcoin without burning your computer and it's really easy i would say it's probably giving you \$5.67 a day no bullshit

Which is a good amount of money for a day

So what are you getting after buying the method?

*A google chrome extension it's mining bitcoin from other pools just keep it on before you go to sleep and stuff you might hit the jackpot as well because 1 bitcoin is around 18,542.76\$ Atm

But because it's mining in pools so you'll get like \$100 the chances of getting it is very low but you are a 100% guaranteed to get \$5.67 a day the price for the extension is 45\$ i know you might it's bs but getting money for doing nothing is crazy in my opinion i am selling it because i think i can get some money out of this method and share it with you guys

Send \$45 and i'll send the link/download for the extension to the email that you paid me from

Have an amazing day

Here's a proof that it's real let me know if you want me to record a video:

This sales thread looks sketchy af. Has anyone ever tested it? Any proofs that it actually works? From what I understood it is an extension created by you, so why don't you share with us some kind of video/screenshots?

Any specific requirements?

You want to spread us?

Lol Looking for some review

nanohits - December 19, 2017, 5:14 pm

yeah looking for screenshots of the extension or vouch copies.

I can easily get this viral. However the trust in this just isn't there yet. Please post a video at least.

Sounds too good to be true but I'll take a vouch copy to test it out and I can post my results back

here. Let me know, Cheers. ?
