Thread: [which pool has normal Hashrate I want want to replace minergate pool](#)

speedcluster - December 20, 2017, 12:01 am

Dear users, as title says let's discuss about XMR Monero Pools

As usual all noobs or experts its doesnt matter, who start silent mining here uses Pool Minergate, as I understand Minergate has simple GUI and also stats you can see on Dashboard (screen was taken from google)

But no one cares about PPLNS and PPS fee that its 1% and 1.5 % per payment, also people discuss about poor Hashrate on there. Once I tested my PC with xmr stak application with other Pool and I get more better result unlike what I got from Minergate.

Only one good thing that I noticed is threshold on Minergate you can withdraw money from 0.1 XMR unlike other pools start withdraw from 3 and over XMR.

Here is my little opinion with this pool, if someone has a normal experience with other pools I will be glad to see his post on this thread, thanks
