Some time ago I've paid \$210 to Rysko for the service/product he was offering here

<https://hackforums.net/showthread.php?tid=5762402>

and the transaction

<https://tradeblock.com/bitcoin/address/1JrWNrFCXsz3zKNU7VBr2pz4vNPm4jcxGX>

Rysko was supposed to provide a setup that will earn \$150-\$250 daily per 15 minutes of work (I was supposed to get the first \$100 in 1-2 days after making the payment).

After trying to setup a meeting with him for several days that's what I got in the end

So I got two shitty ebooks (one is "buy cheap AGC and use them to buy stuff for other people" and the second one is Shopify basics).

Rysko doesn't reply, didn't provide anything else, closed the discussion group were all who bought this could talk (and complain) - he just took the money (over \$1000 from all involved) and doesn't give a fuck about his customers.

What do you expect buying a "money making method"

None of them on this forum work.

Its just the owner being desperate for money.
