Congratulations on the earnings bud,

I've been trying a lot with cryptos but I'm struggling big time to make money, you got any advice?

Any upcoming coins that are under \$1?

Verge looks like a really good coin, it think it can really rival Monero and Zcash after quickly skimming trough their "blackpaper".

Rod\$ - December 21, 2017, 3:29 pm

Just got into XVG the other day, up 100%, but fuck that looks juicy

Professional27 - December 21, 2017, 3:38 pm

Those are some great margin numbers!! Congrats on that and keep making progress. I missed out on the entire crypto scene but this is proof that it's not too late.

honestly if you think like that you might as well jump out the window, you're still very early to crypto

If I jump out of my window, I'd just be out on my front yard but it's winter time out here in the east coast.

I know it's still early when you look at the big picture, but in real life some people have more time than others to invest into learning about it.

I'll find the time to sooner than later, I have BTC saved up from some HF sales but that's about all the knowledge I have about it at the moment.

My friend, be ready for 2018. The crypto "scene" will competely change than how you may view it now. Everyone ask me at what point do I cash out. the answer is when I've made enough that it is life changing. HOLDD for years ahead of us

Vittorio - December 23, 2017, 6:47 am

Another week has gone by, I have now profited \$19000 from this coin.

INCREDIBLE - December 23, 2017, 7:20 am

Great. but currently, 2 coins are expected to take a boost if you would like to consider. NXT because of Airdrop and DGB. they're already up 50% and 100% respectively.

Great to hear man! I made a \$50 investment a few months ago and it's about \$1500. If the coin does hit \$1, I'll be in massive profits!

The only people that are sure to win is the guys creating the hype and profiting from it.
