Thread: [RocketR and Bitcoin - Any transaction gets stuck - any alternative?](#)

Haroshi [™] - December 20, 2017, 9:34 am

Have had contact with RocketR for the last week.

Any Bitcoin transaction i get from them get stuck cuz of their insane low fee's, not receiving any confirmation on any transaction.

Have had contact with them multiple times and they recommend to use their Bitcoin Payout Schedule feature, this feature holds the bitcoins for several days and sends all in one with "high" fees but those arent high those are considered to be below normal these day and still takes days to get confirmed, atleast im still waiting for the first one to get confirmed through this feature.

I was hoping that there are better alternatives or are all similar services handling such low fee's while still grabbing 5% on every transaction.

So selly is having the same issue basicly?

AV1 - December 20, 2017, 11:58 am

Bitcoin is having this issue everywhere, i got a Bitcoin transaction who has 10 days which is not confirmed.

And another one with 3 days.

Idk what the fak is happening :)
