Thread: [gmail sign ups on samsung?](#)

coffi - December 20, 2017, 12:49 pm

if i want to make lots of gmails with non stop on gmail after verifying by phone number .. it asks prove you're not robot.

is there any way to make the phone register again without asking "prove you're not robot" ? something to modify in IOS or root files?

If you could clarify people could help you. Also you can only verify a certain number of emails (it is like 10 or something like that) so dont think with 1 phone number you can go ham.

what i mean is is there anything related in the phone OS or rooted files that can be modified to make gmail not detect that there's a lot of gmails being signed up from the same mobile? before i reach the time it asks for prove ur not a robot and asks for verification by phone

Phone OS? Which exactly? Android? Version? Is your smartphone rooted?
