Thread: [gauth + new phone](#)

Legion - December 21, 2017, 6:16 am

I've just picked up a new phone & need to set up my GAUTH to work from the new phone before I sell my old one. I've been trying to find the feature to remove the GAUTH from the account (then re-set it up on my new phone).

Does anyone know where the disable 2FA is?

I'd also recommend using Authy in case something happens to the phone you won't be entirely screwed.
