Thread: [ARK Moonrocket potential?](#)

Luck 2 - December 21, 2017, 8:31 pm

Does ARK still have a sky high future ahead of it, if so do you recommend to get into it now or dip a little lower, I'm greedy right now on what to do.

I literally have no way of getting in, can't buy ETH or BTC coinbase is not accepting anything so rip me fml

Rake - December 21, 2017, 8:55 pm

I could see ark going high as 50\$ Per in the coming months.

Definitly has a LOT of untapped potential, EXTREMELY polished, even more then lisk, which is valued 3x ark

Thank you

I'll just let those who doubted it look back on it and say I guess he was right

Long term it will be huge. Now I'm very bullish on it and everyone here knows how I feel about ARK, however it can be in the hundreds.

New interesting addition by a delegate

Exactly dude.

I've NEVER been with a community stronger / good as ARK's.

I can say that for a fact, every Crypto I've been in. only one that's come close is NEO , but ARK has way more potential in my opinion.

Even the wallet is the nicest wallet for ANY Crypto I've ever fucking used lol.

Currently voting my ark for biz_private as well, pretty nice to get 7 ARK a day free

All we need is a good marketing team or really any marketing at all to explode.

They focus on developing the product before marketing

Just wait until 2018. Ark will be HUGE, everyone mark my words and threads

?

I'll be thanking you in a few months.

Edit: Correction, I just bought 30.

Mobb-Deep - December 24, 2017, 10:44 am

been looking into ARK for awhile seen a lot of mentions and promising things. Bought in 300 coins @5.90\$ a coin hoping for hold for at least 2-3 months see how it goes.

As per godfathers reply bought in @0.00045400 Sats a coin

Stop using USD value for valuation real increase comes from sats f not that's BTC pricing correlation

Send your ethereum to your desired exchange then sell Eth for btc then btc for ark. Some exchanges have Eth markets too so you might be able to directly buy ark after depositing on the exchange.

Gerymc - December 24, 2017, 10:56 am

Binance allows you to exchange ETH for ARK.
