Thread: [Anyone interested in a PUBG cheat?](#)

Cxmplex - December 22, 2017, 1:23 am

Hey, I do the selling / forum postings for Genesis and I was wondering if anyone was interested in a pubg cheat? We're looking at places to enter the market, but every forum (epvp) we find is cancerous. What were wondering is if there is sufficient demand (we are a premium cheat developer) for something like this. We were planning a limited slot run (3 slots) with the price increasing per slot. What do you expect from a cheat developer?

Note:

Don't PM me or ask for contact information. It is against the rules for us to sell without being allowed to post in the marketplace. We should have a thread up soon.

Seems a bit fishy, proceed with caution.

We know that as we're a new seller, we'll encounter a lot of skepticism. This is fine, we offer a valid product.

Here is a short video we did earlier on another forum. We're working on another video, but I made this video personally and I only have a MacBook (running win10), so the recording performance is terrible:

We'd also be alright with giving a 3-month license to an extremely high-quality member to prove our legitimacy. Also, we're not accepting orders here yet, so there isn't a need to be cautious as we're not selling you anything :)

Hey man, I started out as the same boat as you. If you wanna make sales I reccomend you upgrade and stress that you will use a middleman for all deals where you will allow the user to test the script and check it out before u recieve the funds

If you're interested for someone to make you promotional videos for your cheats etc, PM Me, I can provide video examples and my pricing would essentially be free. PM me.

There are already cheat provider here for PUBG. You can also but with your current status, I guess you need someone who will host your thread or you can buy an upgrade.
