Thread: [\[.Net\] What payment library to choose](#)

Fhack - December 23, 2017, 10:20 am

Hi i search a C# library for an winform application. This library have to permit to send monney to another application user, have you any idea of which library i have to dwnload or paid ? ?

Ninja - December 23, 2017, 10:23 am

To send actual money or what?

Fhack - December 23, 2017, 10:28 am

Any payment method crypto monney / Real Monney / PayPal / crédit card, i just need one of this the Lost simple way

I have found this for bitcoin transaction do you think it's à good method ?

https://programmingblockchain.gitbooks.io/programmingblockchain/content/bitcoin_transfer/transaction.html

Selly.gg happens to have an API.

Fhack - December 23, 2017, 2:33 pm

I have found à solution, i will directly use the blockchain api and créeate à new wallet for each user or my application.

You dont need an API for it, you can generate wallets offline.

Bitcoin addresses are generated through an algorithm:

<http://jackdye.co.uk/generating-a-bitcoin-address-in-c/>

zarlo5899 - December 25, 2017, 6:14 pm

you can just use Paypal its not that hard to get up and running
