Thread: [Followliker Instagram Botting Service](#)

SoulStream - December 23, 2017, 11:10 am

Hey everyone! I'm offering a Followliker Instagram botting service, where you can tell me the settings you'd like, and I'll run it every day for you. This is really good for those of you who are promoting your websites on Instagram and want traffic and views from people in your niche. (This can actually work with eWhoring as well.)

This bot will allow you to follow, unfollow, like, comment, and DM an amount of your choosing per day, and the delay in which you would want.

I have used this on some of my accounts, and the traffic I had changed drastically. With my iPhoneX niche, I managed to get 10k real followers in 4 days with my settings.

If you are interested in this, please PM me or add my skype: natbro0712

Thanks!

1. No one will trust you with their accounts because you can steal them easily.
2. It's better to pay \$99 than be sorry for losing accounts to you.

Well, I mean... any account can be recovered using OG email.

Of course. Is it worth the hustle and stress over having someone not reputable manage it for you?

Either way; my personal point of view is for people to be safe than sorry.

You did not get 10k followers in 4 days without buying them.
