Thread: [BOTNETS / LOADERS / STEALERS - SETUP SERVICE](#)

cArLoS0xc00007b - December 23, 2017, 11:31 am

I am offering a setup of your choice of HTTP Botnet's such as BB 1.8, smoke modular botnet, diamondfox, gaudox etc.

Botnet can be defined as the network of infected computers. It can be used to various things. I will guide you how to use different types of botnets. I have years of experience dealing with botnets and different sources from cracked to legit ones. Choosing this service you will get your http panel running without issues.

Package #1 - 55 USD

- access to vps in offshore location
- bulletproof domain
- setup service
- testing bots
- lifetime support, teamviewer if needed

contact PM/xmpp/e-mail

Bulletproof domain isn't even the hard part really. Finding servers that ignore spamhaus is the problem. Most people charge a lot because of having to fix spamhaus issues.

If you need bulletproof domain. I can get you those easy. If you are doin any vouch copies, I'd like to see a server setup. I have domain already. Just curious about your servers.

Do not listen to this Lukasu Shemazio, he has no clue what he is talking about, after reading his post its clear he does not know ANYTHING about botnets and my service.

All domains are fresh and registered in russian company, lmao cracked domains wtf does it mean rofl.

You trolling yea ? Its obvious that for 55\$ i can only sell cracked botnet, i have listed few botnets, most of them are cracked, but this is SETUP SERVICE, i can tell anyone where to buy LEGIT LICENSES or i can resell my OWN LICENSES.

I have servers in CIS locations(Russia, Azerbaijan, Kazakhstan etc.) and from my experience they usually ignore first spamhaus abuse. Of course if u dont use fastflux you may always get suspended, that is common thing in botnets.

I do not offer vouch copies but i can tell you where to buy server and setup it.

If you need bulletproof domain. I can get you those easy. If you are doin any vouch copies, I'd like to see a server setup. I have domain already. Just curious about your servers.no such thing as a bulletproof domain, unless he's talking about a .bit domain which i would consider the only type of bullet proof domain.

As for me not knowing what I am talking about I obviously do if I make way more money than you doing what I do.

I do not offer vouch copies but i can tell you where to buy server and setup it.spoofex ignore spamhaus as they don't even have any way of spamhaus contacting them apart from personal emails (which they ignore)

I know the owner of spoofex and if you'd like to get a thing going (cough botnet) hmu ?

As for me not knowing what I am talking about I obviously do if I make way more money than you doing what I do.

It's a bulletproof domain if the registrar allows content that would consider it "bulletproof" I.e botnets, phishing pages ect ?

cArLoS0xc00007b - January 6, 2018, 3:57 am

Still doing this for everyone, now testing bots available
