Havij 1.17 PRO - SQL Injection Tool

Havij is an automated SQL Injection tool that helps penetration testers to find and exploit SQL Injection vulnerabilities on a web page.

It can take advantage of a vulnerable web application. By using this software user can perform back-end database fingerprint, retrieve DBMS users and password hashes, dump tables and columns, fetching data from the database, running SQL statements and even accessing the underlying file system and executing commands on the operating system.

The power of Havij that makes it different from similar tools is its injection methods. The success rate is more than 95% at injecting vulnerable targets using Havij.

The user friendly GUI (Graphical User Interface) of Havij and automated settings and detections makes it easy to use for everyone even amateur users.

Download: If someone has the clean version, please share.

itlovers - December 24, 2017, 1:23 pm

hahahahaha very funny, I was thinking u share a link for download

souteir - December 30, 2017, 2:38 pm

I got one copy for free, just like your's, but not clean~if anybody want it ,PM me

JELLY?IsH - December 30, 2017, 2:39 pm

This still exists? Woah, that was a great tool back then.

SomethingUnique - January 8, 2018, 2:31 pm

Still exist and still the best sql injection automation tool.

SIM-2763166 - January 8, 2018, 2:33 pm

I might have a clean version on my PC.

PM me

ernestmiller - January 19, 2018, 6:01 am

Would this run on Linux through Wine for example??

If you're on Linux use sqlmap. If not, it may work under wine3 but otherwise I don't think it'll work.

raigorstonehoff - January 21, 2018, 9:25 pm

SQLMap is better than havij for some reason, Example,
WAF Technologies keep changing, and Hajiv didnt let us to custom it.

SQLMap have a tampering script or we can create our own.
Anyway, just my opinion.

I am testing 1.15 version.

Punka421 - January 30, 2018, 11:26 am

is anyone still using this? i thought they stopped at 1.15?

AlienDip - October 31, 2018, 8:12 pm

can I get a breif description of what SQL is?

How about actually looking it up for yourself instead of being a braindead sperg gravedigging threads. If you can't even look "SQLMAP" up on google, then what the fuck makes you think you're going to actually do anything? Fucking skid ?

To answer your question unlike the previous user.
SQLMAP is a python based application. As long as Python is installed and had the right modules

the application will work.

iyed - December 25, 2018, 2:28 pm

Using sqlmap is better than havij , it has got more features.

meshal1 - December 26, 2018, 5:10 pm

Looking for clean version as well, can someone share it?

kulem07 - December 28, 2018, 6:23 pm

I might have a clean version on my PC.

PM me

s0m4ds0b4d - December 28, 2018, 9:19 pm

Anyone happen to have the clean version? And is the old 1.15 version of havij even still worth using?

Sorry for stupid question just been out of the game for a while.

EDIT: And if anyone need clean version of 1.15 crack I still have it somewhere on dropbox so shoot me a DM if you need it.

What do you mean by safe version ? did you just mean "clean" ? If that's the case I suppose there are some, but I'd never deal with such a skid tool

Indie Developer - January 7, 2020, 7:03 am

havij is the best shit tool ever lmao

theway1714 - January 9, 2020, 1:16 am

Please anyone with shop admin for sale at cheap price

KoYoGotit - January 21, 2020, 4:48 am

Havij is outdated

tha last version 1.17 released in 2012 and closed development.

Havij cant exploit new websites because of WAFS changing and updating regularly and havij has no idea about.

it will exploit websites that has been exploited and dumped their DB by number people like you in the last years that use same tool HAVIJ.

I would recommend people to learn sqlmap it has a number of evasion scripts for WAFS and can perform different injection method if one is succeeded.

glitchmax1993 - June 18, 2020, 10:05 am

thanks mate i like it What is the name of other tool?

frank3nstien - June 19, 2020, 1:46 am

I really don't get it why people dig up the graves. I wish HF Admin atleast put restrictions and not allow Newb's to access threads atleast 6 months older

Kaveri123 - June 25, 2020, 11:39 am

Can I also have the clean version of it?

innokentiyjerome - June 26, 2020, 10:23 am

lets check this program.....
