Thread: [Country lock](#)

**solitario\_moder** - December 25, 2017, 6:44 am

Hi  
I see that parental lock is on  
now I have to use VPN ?  
because it does not block IPs that make DDOS or malicious user. ?  
  
Admin: please unlock my IP, do not want to use VPN to navigate the forum  
  
Thank you ?

Are you being serious? How is the admin on the forum suppose to remove the parental restrictions your parents gave you.

it's not only my country  
have to filter the IP's that attack the forum  
Why is my IP blocked?  
I did not do anything wrong.

If you're connecting then you're not blocked. If it's another IP that's blocked then I can't guess which one that is. A block may be for a number of reasons. Likely this is something I can't fix because it's on your end.

Now I connect over VPN  
if you can send it PM and I'll send my ip
