No one said it was a shit coin on that thread, most people said they were going to invest and a few people said it was a pump and dump.

Nice mate! A week ago and "un upgraded" user posted about Dent when it was .00000500 ETH and most people ignored him.

Now its .00004000 eth haha. Luckily I got in on it and I'm making mad profit atm.

i sold when i was up 300,000% and i still think its a shit coin

problems.x - December 25, 2017, 10:55 pm

Still doesn't mean it's not a shit coin. Bitcoin has influenced every coin to rise in spectacular ways these past few months lmao.
