Read my post very carefully! This is for developers only, so unless you know what you're doing don't do it yet!

Somehow I don't like you lol

I'm really excited for this, can't wait to jailbreak mine once they release the full jailbreak!

Can't wait for Cydia and everything else to be updated (¬?¬)

DO NOT DOWNLOAD unless you are a legit developer this jailbreak is the alpha of alphas it's not even a full jailbreak its only partial and has a very high chance to rape your phone and force you to update... for your sake wait until there is a stable release!!!

But yes cant fucking wait it's gonna be so good. Apple sells their phones new with ios 11.1.0 so I can jailbreak straight out of the box lol.

Adam do u have any regretz

b4rk - December 30, 2017, 1:32 pm

Kind of gutted, never thought jailbreak would come to 11.1.2 in the near future so i ended upgrading to 11.2.1.

Ill have to hold out on this one and hope they can do it.

What do you mean? You can jailbreak 11.1.1 stable with Electra.

Does anyone have a solution for iOS 10.3.2 iPhone7Plus, I set my nonce with v0rtexNonce app to match my 11.1.1 nonce, I have my shsh blobs, whenever I run FutureRestore, it gives me a "DeviceNonce does not match"
