Thread: [Imminent Monitor Help](#)

OKHACKS - December 27, 2017, 10:56 am

Over a year ago i bought imminent Monitor.

Whenever i open imminent and login it then crashes and says "Imminent Monitor stopped working"
Im using the latest version
Im on w10
I have antivirus and firewall off.

my debug.log has this

```
[1227/182624.375:ERROR:child_thread_impl.cc(762)] Request for unknown Channel-associated  
interface: ui::mojom::GpuMain  
[1227/183141.091:ERROR:child_thread_impl.cc(762)] Request for unknown Channel-associated  
interface: ui::mojom::GpuMain
```

If anyone can help please do!!

that error appears to be an issue with a chrome driver. however, uninstall imminent monitor completely & reinstall the latest version. tell me if that works for you.
