Booba92i - December 27, 2017, 6:10 pm

Ok so I just did that at 790 sats.

I've set my stop loss at 650.

YOLO.

J4cked - December 27, 2017, 6:13 pm

Damn if you had invested that much when it was 0.005 a few months ago you'd be a millionaire.

Also, if anyone wanna get on this with a small amount of their portfolio. I'd say buy and sell at 1350, rebuy and sell at 1500. Rebuy the drop, sell at 1700.

1350, 1500, 1700. I just don't like doing this, but there's a high % that this is what is going to happen.

I'm out! Good luck guys!

Yes it really can go up quickly. People seem to forget that Verge has had the biggest alt social media attention for the past 24-48 hours with all the FUD. It can shift really quickly with a Wraith protocol release, everyone is watching.

You just invested with a guy that tweeted this and is the only confirmed "developer":

All I know is if the devs release a functioning and good looking product by Jan 1 Verge will moon, and it will be up there with coins like Monero, ZCash, and Ripple.

If the devs fail to release Wraith everyones assumptions that Verge is a worthless shitcoin will be correct.
