Thread: [Smoking Weed vs Smoking Chop](#)

**District** - December 27, 2017, 11:28 pm

Do you guys prefer to smoke your weed straight or do you smoke chop? And why?

(If you don't know what chop is, basically, it is weed mixed with tobacco all chopped up).

I don't smoke chop because I just smoke a cig after smoking a bong.

Never heard it called chop before, by me we call it a spliff.

I find the head high from grabba (tobacco) makes me to light headed.

In the Netherlands we only smoke weed with tobacco mixed up. almost never bong/pure

Just weed imo, nothing else mixed in.

Depends on where I'm at if in decent privacy I'll smoke straight weed and in public spliffs all the way or when I wake up I'll make some good coffee & smoke a spliff.

Never heard of this but I guess it would make sense if it's out in public and weed is not legalized.

What in the world is chop? Is chop like, that synthetic stuff?

Obviously weed alone is the best, most people in Europe smoke spliffs tho (mostly with hashish, not leaves), because it's cheaper and easier to get.

Never heard it being called chop btw. Always been "spliff" for us.
