Thread: [Best 1080 budget gaming monitor for pro fps games](#)

Bubblez - December 28, 2017, 11:45 am

I'm looking to buy perfect budget monitor for games like csgo. pubg and fortnite so I can compete on more competitive level. I need recommendations! Prefer amazon links.

Get something like this or with a 1ms response time. 2 if you don't care THAT much.

1ms response time monitors are the best to be looking out for
I'm using an AOC G2460F don't know if that's even a thing anymore
144hz with 1ms time, paid it around 150\$ in my country.
