Are password stealers allowed E.G a steam stealer for example?

Couldn't see anything about it here <https://hackforums.net/misc.php?action=help&hid=21> ? Sorry for the noob question ?

So essentially a keylogger? I'd assume why not as people sell keyloggers.

Steam stealer would work I suppose considering it isn't "Non-Free Accounts". I can imagine people selling cracked LoL accounts as well.

Steam Stealer would be next to useless but as long as it's not like a Paypal stealer, for obvious reasons, you should be good.

You don't have to imagine it ;)

Yeah it's essentially a keylogger, But only activates on pre-determined sites/apps like FB, twitter etc, the user would be able to choose from a list of sites on the builder.

Well as said, as long as it's not stealing PayPal accounts, bank passwords and that sort of stuff, you should be good.

Keyloggers, which can result in compromised game accounts = Yes
Financial stealers, or anything that can compromise financials = No.

To try keep it simple.....
