Thread: [\[READ\] Suggestions That Will Not Be Accepted](#)

Omniscient - July 30, 2010, 2:15 pm

The following suggestion types will be automatically denied and the thread locked.

1. Rule suggestions. I will not take them at all. No one but me makes the rules here.
2. Moderator Suggestions. I don't care what section you think needs a moderator or who you think would make a good moderator. Staff is chosen by me and current staff alone. Don't PM me or staff either kissing ass to be on staff. It won't happen.
3. Sticky Suggestions. I'm not interested in your opinion about what makes a good sticky.
4. Layout Suggestions. I control the design of this site. I don't want to know what you think is better.
5. Regular Member Features. If a feature is only for l33t/ub3r it's not going to be handed down to regular members who did not pay for the feature. Any new features of the site will almost always be for upgraded accounts.
6. Chat/IM/Shoutbox/IRC. We will very likely never have any chat system in place on this site and for lots of good reasons.
7. Thanks Button. I will not add one here. Site is too large and a feature like this would cause load problems.
8. Member Restrictions. HF will not be taking suggestions for new restrictions on the site based on post count, registration date, or reputation.
9. Group Suggestions. Any new groups will be created by me and will have a site purpose. Member controlled usergroups will no longer be added unless they are a paid group (read [Help Docs](#)). Don't suggest groups.
10. Notification/Alert Systems. I will not be adding notification systems for actions like being quoted or when your name is mentioned.

Tate - July 30, 2010, 2:17 pm

Thanks, sick of suggestions for number 2, 3, and 6.

I didn't know we couldn't suggest #1 though. What if it's just bringing a certain thing to your attention, like Zeus?

NewKidOnTheBlock - July 30, 2010, 2:19 pm

So what sort of suggestions ARE accepted? (just sort of so that everyone is clear)

Tate - July 30, 2010, 2:22 pm

Forums, subforums, addons, removal of addons, the changing of a certain thing not listed above, etc. Just browse the suggestions, you'll see the things that have been denied / fussed out.

I agree. There should be a few exceptions on #1.

Pittsburgh_Steelers - July 30, 2010, 2:30 pm

thanks!!! i might change my username to "Omniscient's Bitch"

Omniscient - July 30, 2010, 2:36 pm

I'm not going to take rule suggestions. That's final. I have my very good reasons for it. And no don't ask what those reasons are.

Momiji - July 30, 2010, 2:40 pm

I actually like this thread, maybe now we might see less [DENIED] prefixes in this section.

Simba™ - July 30, 2010, 2:42 pm

Thanks for this Omni, and i'm happy about the Rule about ass kissing...

P?r?more - July 30, 2010, 2:42 pm

This should reduce the amount of suggestions greatly and only have the most reasonable left.

Swat Runs Train - July 30, 2010, 2:42 pm

Hackforums is a nice place as it is now. I agree with you Omni. No need of extra rules => more limitations. [:D]

Omniscient - July 30, 2010, 3:05 pm

We have a lot of need for more rules. But adding them isn't anywhere near as simple as one might think. There are legal issues as well as logistical problems. Every new rule increases greatly the amount of reports staff recieves.

I'm being forced into a corner by members when they suggest and sometimes even demand new rules. I've had enough and as of today all rule suggestions will get vehemently denied.

New rules will come in my timeframe.

I hope to see members focusing their suggestions on how to improve the forums or add neat new Ub3r/l33t features, instead of whining because some shred of blackhat activity is allowed in some corner of a forum etc.

No need for a update on this, if people are stupid enough to disregard this thread and post something listed from the above they deserve a ban.

I think this is fine,

I like the layout of the website and the shoutbox would be too over-crowded with members.

The thing is, I'm not sure whether it counts as low quality.

Take this thread for example.

<https://hackforums.net/showthread.php?tid=3921159>

Out of 8 posts, one is the original post asking for an appraisal and one is 630's appraisal of the price.

Following that, there are 6 other people that pretty much repeat 630's appraisal.

I've noticed this a lot within the section. One person appraises, and another five to ten people basically repeat the first person's appraisal. This occurs especially in threads where the item being appraised is appraised at 0.

Omni you should add "Drugs Section" here. It's among many commonly repeat suggestions but it's unique because the answer is almost always "Omni has stated this will never happen." by a mentor or staff, or sometimes even you will restate it yourself. Small simple change that likely wont have any tole on the threads being created but it's good for reference nonetheless.

It is not "on site". The hackforums XMPP server is an external service provided to ub3r members, and is not the same as an on-site chat system.

I like the concept of this thread, But you'll still most likely see a few of these suggestions because of people not taking the time to read this thread.

Good thing I read this because I was about to post an idea about 10.

If I my ask why can't 10 come into action?

For those this is 10. Notification/Alert Systems

I believe Omni replied on some topic along the lines of "you're not that important to receive notifications when someone mentions you."

Hi,

I am new to this forum with the hope to find lots of good movie info and links. I was an admin to a satellite forum for many years and I just wanted to point out few things:

1 - "Suggestions that will not be accepted" - It is like "give your feedback but only what I want". The "suggestions not accepted" is a non-sense term, suggestions are always provided thus accepted when feedback is encouraged. What is done with them it is up whoever is in charge.

2. - Password requirements. I found few forums to implement a password policy. The password policy creates difficulties for members since are obliged to enter a certain number of characters with specifics. If a user has a general password for forums, one for email, one for bank and so on, when some forum comes with a condition, it screws everything up. Think about it! Hacking a password is not the case since all passwords are encrypted in the forum's database, so either a password has 5 or 10 characters is all the same. After all, not even a bank will ask you to enter a minimum 10

characters password.

He is in charge and he is telling you he won't accept your suggestion if it fits his description, he has no obligation to accept it. So instead of wasting time to tell everyone no he can tell them no before they post.

Edit: Just read part 2.

If a user's Skype for instance is hacked and his forum password is the same, the hacker will have access to both making it really easy to scam members with the hacked account if it is trusted.

There is.

Spoiler ([Click to View](#))

Low Quality

Threads, posts, and characters in threads and posts that are non-contributive, are non-supportive, and are generally incoherent fall under this. This includes but is not limited to the following variations and instances:

Avoiding character requirements in a post by adding empty characters, special characters that do not appear when posted, fillers, useless text (e.g. "35 char", "", "" or """) or a ridiculous amount of smileys to bypass the limit;

Explicitly repeating what another user said;

Posting of memes as an answer to the topic;

The intentional use of broken English (e.g. Dolan Speak);

Trolling; and

Quoting posts without adding to them.

I'm fully aware that layout suggestions are not accepted but maybe just a little update on the general
look of the forums? It looks very outdated and some parts looks so cluttered. The background and
the color schemes are not helping at all either. It won't be much change. Just paddings/margins here
and there, color and background changes, and other tiny stuff and it will mostly be on the css
section affected so I hope you'll consider this.

personally i don't have any problems with rules and restrictions but be honest they way all sections
restricted with limitations these are too tight and force others to spam for unlocking them and in
result they got banned for sure

if you look at all those from 1 to 10 he don't cares make things scary this topic shows me that any

type of suggestions rejected straight away its my opinion though

You don't have to spam to get posts.

It isn't hard to contribute to the community with "high-quality" posts as one can say.

Go around and contribute, stay on topic, and don't flame and you'll receive the adequate amount of posts for those sections if you need them.

Maxjimme - February 16, 2016, 10:25 pm

this is what i am talking about i try few sections to share some but most section links images videos not allowed till certain number of posts or upgrade so i cant share those this is why i said its really tight rule here

ok so you're actually complaining about your own limitations but trying to act like you're doing the community a favor

The rules are set for a reason.

Maxjimme - February 17, 2016, 3:14 pm

for me its never be there its general if anybody who like to share having these limitations? than how he will contribute only way left which is upgrade otherwise he needs to comments in threads and wait days before he make his own contribution or spam/leech and get banned i mean to say there should be few more sections or liberty to share stuff in some sections
