Thread: [HTML. Can't make this button go up](#)

Account of the Gods - December 30, 2017, 7:31 am

```
Code <div class="widget_wysija_cont shortcode_wysija"><form
id="form-wysija-shortcode5a479c9e81b47-1" class="widget_wysija shortcode_wysija"
action="#wysija" method="post"><input class="wysija-input validate[required,custom[email]]"
title="Email" name="wysija[user][email]" type="text" value="Email" /> <span class="abs-req"> <input
class="wysija-input validated[abs][email]" name="wysija[user][abs][email]" type="text" value="" />
</span><input class="wysija-submit wysija-submit-field" type="submit" value="Subscribe!" /> <input
name="form_id" type="hidden" value="1" /> <input name="action" type="hidden" value="save" />
<input name="controller" type="hidden" value="subscribers" /> <input name="wysija-page"
type="hidden" value="1" /> <input name="wysija[user_list][list_ids]" type="hidden" value="1" />

</form></div>
```

Okay I know its very basic (usually) but i have this code and can't make it seem normal. i have no problems with html nor css usually and been doing websites for many years yet this is making me problems.

Right now its like that (BAD):

I want it like that (Good!):

Anyone please! I am wasting hours instead of working on my projects :s

What happens if you throw the whole thing into a <div>

its in the div already

ryan? - December 30, 2017, 7:48 am

Can you just link to the live version?

Nachfolger - December 30, 2017, 8:07 am

I assume you have both elements to "display: inline-block" in addition to there being enough room for them to display inline?

ryan? - December 30, 2017, 8:17 am

Replace:

Code <input class="wysija-input validate[required,custom[email]]" title="Email" name="wysija[user][email]" type="text" value="Email">
with

Code <input class="wysija-input validate[required,custom[email]]" title="Email" style="float: left" name="wysija[user][email]" type="text" value="Email">

You just need to float the textbox to the left.
