OVERVIEW

This ebook is really great for beginners in cracking. The ebook is written really good and every detail is written. All info which you will want is there. From best places to sell, to tools for cracking and designing your own shop.

METHOD

Method is really fast and easy to use. The setup is to 10 mins and then you just do nothing, this method is autopilot.

PRICE, IS IT WORTH?

YES, That money which you will invest will be back in 3x more. You just must set the best prices and people will buy from you.

9.5-10

Buffer called me out about me saying all eBooks are shit so he challenged me to check out his method for cracking/AIO Cracking Guide. I will say a part of this this is public if you google or use other resources, however he compiles all of it together and gives you a lot of good insider knowledge. Wish I had this when I first got into cracking, GJ Bluffer for actually producing HQ Content.

(Dec 25, 2018 12:01 AM)dlv Wrote: [\[CITE\]](#) You can look at my post history and know that I don't often leave vouches, so if I do it must mean something! Out of the countless amounts of bullshit that I bought on HF, this is the one eBook that I can safely say does exactly as advertised. I originally came to this section of HF to buy some accounts for myself, but I saw this ad and I figured "eh, why not, I can do this shit myself". Bluffer was great at helping me and explaining everything in his eBook via Skype and within an hour I was cracking Spotify Family accounts.

I will emphasize that this process isn't necessarily easy and I did have to invest a bit to actually get this working as efficiently as possible, but I can see myself cracking more accounts in the future and potentially selling them here for those that don't want to put up with all this. I'm super happy with this purchase and am relieved that working with Bluffer was so incredibly easy.

Looks like a clean method overall, I like how you included images in the process.

Add a Q&A section to answer what it the ebook teaches. (where to get proxies, where to get combos, and such)

Kumara - January 2, 2018, 2:13 pm

Upon receiving, it actually has over 100+ megabytes of data in the archive. I'm really glad it wasn't ~4MB, like most guides like this one, lol.

After playing with it, the tutorialS, yes with the "S" at the end, because there is way more than 1 tutorial in the archive, I am very satisfied.

It comes with way more than what you need to get started.

Besides it not coming with a web source to set your own website up with, it teaches you how to market these accounts, step by step.

Word by word, step by step, it teaches you exactly what to do and how to do it.

I'm actually cracking accounts on my RDP as I type this.

Thank you for this, it's a very high quality guide!

Highly recommended to any person lurking this thread.

Haven't had time to update the thread but combomate is not working right now and I haven't been able to get it fixed so you can exclude that from what works with this. Everything else listed is absolutely working and because of the inconvenience I've added a readme which lists some sites you can get combos and configs from!

This is a guide that is best for newbies to cracking.

When they want to know how to crack and don't know where to start they buy this guide and within

no time they are operating their own account shop on here. Check a few posts above you for proof of exactly that.

Fein - July 12, 2018, 6:51 pm

I'll give this a rating of 10/10,

It is rather self-explanatory on the setup of this, although there is still in-depth explanation. You literally can have zero knowledge in this category and learn everything you need to know with purchasing this guide.

When he says "Includes everything" he is not joking, it literally provides you with everything you need to get you going in the right direction.

I gave this a 10/10 rating because everything in the thread accurately describes what you receive and would recommend people to purchase this if they are interested in making some side change.

It is easy to read, fluent English throughout the whole guide.
I've already had results with this guide within 24 hours of purchasing it, you can too.

I hope others take advantage of this offer, good luck with sales man!

Does this Guide include

- How to extend cracking to other niche websites (not your average Netflix/Spotify or w/e)
- How to gather combos

Also - How aren't combo lists like, overused? I feel like theres 20 people using the same combo list at a time. Probably a way to shuffle up the file I guess.

Also - How aren't combo lists like, overused? I feel like theres 20 people using the same combo list at a time. Probably a way to shuffle up the file I guess. This guide focuses on teaching how the Sentry MBA software works, what websites the user chooses to get configs for is up to them.

Previously there were combos included but now those have been removed and replaced with a readme file that explains to each customer how to get fresh combos and configs and proxies (for free) every day!

At the link I give them, the configs they can choose from are strong in variety, definitely more than just Netflix/Spotify.

I'm glad you bring this up though, it's an excellent point that if we still were giving each customer the same combos that they would have no success whatsoever.

(Oct 28, 2018 06:14 AM)Izzy2016 Wrote: [\[CITE\]](#) Bluffer, what happened to accountgen.co and people who paid for 'lifetime' access?

The account generator was a project I owned and ran over a year ago. The lifetime access as it was explained in the TOS was only for lifetime of the project. Do you actually think anyone here who offers lifetime on a product will continue to support that product for years and years?

June 2017 is when I sold the project, i've since moved on, if you go to accountgen.co now it redirects to something called accountbot. I know the owner and can vouch for his site, it's a more modern account generator is the way I would look at it, it's an account shop but you sign up on their website and you can have your account automatically replaced when it stops working.

I hope you understand, I've moved on and this is not the place to ask me about the generator.

Ziamerkov - December 14, 2018, 12:25 am

Realistically; How many accounts could one crack every day?

What platforms are you cracking?

Bluffer - December 14, 2018, 9:07 am

(Dec 14, 2018 01:25 AM)Ziamerkov Wrote: [\[CITE\]](#) Realistically; How many accounts could one crack every day?

What platforms are you cracking?
It's going to depend on a few things.

- Is the website you're trying to get accounts for a popular website? Is there a lot of subscribers? Or is it a smaller website with less users?

- What's the quality of the combo list you're using? Is it a combo list that was found for free? Or did you pay for it?

When you say what platforms can be cracked? I say literally almost any site that you can think of. Just type in on google "sitename - sentry mba config" and see if there is one. If there is you can crack it as long as that config is still working.

So if you have a good combo, a good config and good proxies (also included where to get them) you can likely crack hundreds of accounts a day.

WWE Network is an example I'll give you, when I crack WWE Network accounts I use a (fresh) public combolist and a config that I've had for years, and every single time I manage to get 20-50 accounts, but that's never finishing the combolist, that's just being bored and saying to myself that I have enough accounts.

If you have any other questions please let me know!

You can look at my post history and know that I don't often leave vouches, so if I do it must mean something! Out of the countless amounts of bullshit that I bought on HF, this is the one eBook that I can safely say does exactly as advertised. I originally came to this section of HF to buy some accounts for myself, but I saw this ad and I figured "eh, why not, I can do this shit myself". Bluffer was great at helping me and explaining everything in his eBook via Skype and within an hour I was cracking Spotify Family accounts.

I will emphasize that this process isn't necessarily easy and I did have to invest a bit to actually get this working as efficiently as possible, but I can see myself cracking more accounts in the future and potentially selling them here for those that don't want to put up with all this. I'm super happy with this purchase and am relieved that working with Bluffer was so incredibly easy.

There is nothing called private in this method, Everything is PUBLIC all you need to do is search.

The 2 Bonus Softwares Don't work and very sure it doesn't work for anyone, I have tried on 3 - 4 VM Systems

Public Config and Combo seems to die FAST which makes it very difficult to survive

This Guide is OK for Beginners' who Don't know SentryMBA but i would suggest to do some google/youtube.

A trick here is having your own PRIVATE Combo and Private Config to survive, But the Author Failed to shower some light on this part

I wouldn't Recommend buying this, Good Luck

You're a moron who didn't read the OP. It's explained that this is a newbie guide for those who haven't cracked before. I specifically encourage those who are buying accounts instead of cracking their own to buy this. It's explained in the OP and in the readme included that the softwares included are as is, they may or may not work for you, no support included for them.

There are NO public configs and combos included with this but there are links to places you can get them. Again this is a starting guide, not something anyone with experience cracking should buy, that was made clear imo from the start and also this has been selling here for over a year now, you're the first to have such a negative opinion of it, maybe it's you?

Private combos and private configs can be purchased and I'm happy to explain that to those who buy this guide and also give them resources for where to buy them.

I think you are an idiot for not reading the thread and that sums up your opinion of this product. The feedback from everyone else speaks for itself.

You're a moron who didn't read the OP. It's explained that this is a newbie guide for those who haven't cracked before. I specifically encourage those who are buying accounts instead of cracking their own to buy this. FYIII ... This is not your guide.. Your Just a Reseller. NO Hard Feeling but this was my opinion, This is overpriced for a tutorial which is free over the internet.

AGAIN YOU STILL HAVE TO INVEST CASH IN PRIVATE COMBO AND CONFIG.
