Thread: [Legit Signals - Avoid losses and make real money](#)

**Zinedine Zidane** - December 31, 2017, 12:32 pm

After seeing all the signals channels ... I decided to share with you my trading skills.

- 95% gains
- 2-3 free daily signals
- Profit : min 5% - max 568% , average : 42%
- Duration about a week

Before launching the channel I decided to make 60 trades in the last 20 days to test my effectiveness.

If I took 5% profits in each call and close the thread there would not have been a single trade failed, which means : 5% 60 times : 300%.

The highest return was from POT and GRS which gave 565 and 568% respectively.

The calls are mostly short and mid term. The duration is usually about 1 week.

Average return: 42%

Lowest return: 5.28%

You should try to make your calls have a pattern.

FEEDBACK (Take it or leave it)

When you spam your calls in different message I have a hard time knowing what coin you are talking about.

Try to make your own structure and always use it when you make a call, also try doing it in like 2 messages. If not it gets confusing.

Other than that, thank you for your calls, happy I joined.

You can buy the coins he recommends on whatever exchange has them.

You can find which exchanges sell that coin by going to its coinmarketcap page and going to "markets".

**Zinedine Zidane** - January 9, 2018, 4:27 pm

Calls of the day : ETC & ARK

ETC up 20% from the call

ARK up 20% from the call

Total profits or the day: 40%

Not a bad day at all, it's even a great day.

He doesn't give out signals unless they're quality which is why all of them have been profitable. You can't force good signals when the market is a blood bath.

Newbie question, since all the coins is now dropping, for example, you earn 20% profit from AION now then after the day, all the coins just drop, so your 20% become -20%, the question is, what's the best thing to do with this situation?

**Zinedine Zidane** - March 3, 2018, 11:35 am

03/03 UPDATE:

[CLOSE] VIA call made on Feb 20 Gave us a max return of 27%

[IN PROGRESS] OMG call made on Feb 23 is on the red like 90% of alts, but keep your position on OMG, I am very confident about this coin.

Most calls are good/very good

I do it as an "attention signal" and do my own research after the call

The most important thing you need to understand is that he may give you nice calls and you can profit overall, but if you have more knowledge that you have been gathering yourself it WILL improve the results

Nice call on xlm yesterday, I was expecting it to go exactly 300 where it would hit a wall and then bounce up but you actually got it pretty much right at 302-304... it only got to 301

Keep up the good work ?

Hey,

Joined your group. looks great so far, but I am a little bit confused of what are you quoting the prices in, for example you called buy for AION 290-305....290-305 what??? I looked it up on coinmarketcap and the only thing that comes close to that number is "BTC volume"....if that's correct then cool I will keep following your advice, kudos! If am wrong, what are you referring to?

Also, I am guessing Targets are correlated to the same thing...anyways thanks for a ton for awesome group ? ? ? ?

feel free to correct me if I am wrong :) regarding what you are quoting buy and target signals at...and what is the easiest way to keep track of them ?

EDIT: Nvm, I think I have it figured out...you are quoting the prices in sats correct?

EDIT 2: NVM! I went through of your trades and some of them to buy/sell in sat prices, some don't so I am really confused of what you currently calls are in haha! Thanks for your help once again :D
