Thread: [Problem creating a builder](#)

**DankG** - December 31, 2017, 4:40 pm

ive been trying to make a builder for a simple app ive made and i cant seem to figure out if its possible to build an exe from a text file in resources that requires two network class files to run. is this possible? ive been searching online and can't seem to find anything.

thanks!

**Ninja** - December 31, 2017, 5:06 pm

As long as you add references to the classes then it should be fine.

EDIT:

[https://msdn.microsoft.com/en-us/library/system.codedom.compiler.compilerparameters.referencedassemblies\(v=vs.110\).aspx](https://msdn.microsoft.com/en-us/library/system.codedom.compiler.compilerparameters.referencedassemblies(v=vs.110).aspx)

I suggest using the writing bytes method -
