I purchased ZZ's McAfee bot last night and he was extremely helpful and supportive with setting it all up. He spent almost 5 hours with me on telegram and TeamViewer to make sure everything was working correctly.

The bot is very clean and I have tested it 20+ times. It's working very quickly and I cannot wait to use it tonight ?

ZZ helping me on Telegram:

Don't hesitate to approach ZZ at all, extremely helpful user and also great to talk with.

I'm open to answer any questions about people thinking about buying this bot.

? GOOD LUCK TONIGHT TO EVERYONE USING THE BOT! ?

Are you giving away Vouch copies ?
Looks promising, GLWS

May I ask what's the difference between yours, and the other ones being sold?

Covalent - January 4, 2018, 10:24 am

one of the image you posted claims you lost money. why would you put that in your sales thread?

I do not know what others are selling I have never tested their products
but one thing is certain: I know the quality of my products

Holy shit I lost money !

Sorry for losing 0.000007 BTC (0.10 USD) to try my product. You should know that the bot doesn't buy at the last price but at the ask price + a certain percentage, and I just bought DCT to try the bot. I don't care about this coins, I just sold immediately after which made me lose a few cents.

No matter, I don't have to justify myself

Yes of course.

I like when an account stealer (<https://hackforums.net/reputation.php?uid=1134272>), an amazing coder (<https://hackforums.net/reputation.php?uid=2206180&show=negative>) and a product reseller (<https://hackforums.net/showthread.php?tid=4309864>) proposes me to analyze my code and leave a review.

Bittrex has disabled registrations, so a lot of people are using Binance, could you make it work for that?

Read the thread mate, I said that I am able to make you a special bot for your exchange (Poloniex,

Binance, Cryptopia ...)

PM me for more info

I highly recommend this bot if you guys want to make some risk-free profits, it is working perfectly fine for me. Even the shit call John has made last time it still managed to get me out with some profits!

Zidane knows his things when it comes to coding, you can trust him for that and get it fast because this glitch will definitely end someday, that is my advice.

Thanks. I think it's not a big deal to do my best for a customer

Good luck for today

Made a good 20% last week even on DOGE!

Helped me for a few more hours getting it working on Cryptopia, highly recommend. Can't wait for McAfee's tweet tonight.

Icey. - January 15, 2018, 2:23 am

I'll post here and probably come back and pick this up :)

John decided to pump a high marketcap coin this week.

The pump wasn't so high

Got a +10%

Profits are profits

Lorenzo Gucci - January 22, 2018, 8:38 pm

Bot is working fine at the present moment.

Hey Zizou! I am very excited about this product but I have few questions left:

1) How safe is this to do with your exchange accounts? I mean if the exchange detects the bot (bittrex, binance), they will ban your account and you will lose all your money. So can you tell me how safe this is?

2) Also is it possible with this bot to get initiated for multiple coins, so that it automatically buys and sells, and buys again and sells again (etc..), so that it automatically generates money when you are afk?

Would like to hear your response, cheers!

I use bots for bittrex and Binance for about 6 month, and I have never been banned. It's 100% allowed.

You can edit the script to add everything you want.

Best regards

Have you thought of creating a bot for pump groups on Binance/Cryptopia where you manually input the coin abbreviation (eg BTC) and it will pull information from a config file (how much you want to spend, profit %, buy at % above current price)? There's a big market for fast bots like this.
