Thread: [Start Your OWN BTC ACCELERATION SERVICE TODAY \[SCRIPT AND SITE SETUP\] \[\\$20\]](#)

Ben Shapiro - January 5, 2018, 12:20 pm

This script coupled with site design will allow users of your site to automatically re-broadcast their transactions. You can easily monetize such site by inserting ads or collecting donations!

Utilizes ajax

Simple yet elegant design

Rebroadcasts bitcoin transactions

Allows for donations in whatever form you would like

PM to buy accepting all crypto and PayPal!

T.O.S.

- I will be providing support when I'm available. This site is so easy to setup though you just need to follow 4 steps in the README.txt
- Refunds will only be given on a case to case basis but as a general rule of thumb, I will not be refunding, especially if you cannot figure out how to use this.
- Obviously NO leaking OR reselling.

[BIG SHOUT OUT TO HUSKO FOR THE FRONT END WORK! SUPER CHEAP AND RELIABLE CHECK HIM OUT!](#)

[Also selling the perfect domain to go along with the source code, BitcoinHatch.com]

sm?ked - January 5, 2018, 12:30 pm

Would I be applicable for the review copy?

I don't usually ask for vouches on stuff like this, but i'll give a hell a honest review

Y3LI0NZ - January 5, 2018, 12:30 pm

Looks like a nice site dude.

Nice job.

Cadent - January 5, 2018, 12:31 pm

credits to me for the frontend web development hehe xd

Triestri - January 5, 2018, 12:32 pm

How does this actually work?

Ben Shapiro - January 5, 2018, 12:36 pm

(Jan 5, 2018 01:30 PM)Lads. Wrote: [\[CITE\]](#) Would I be applicable for the review copy?

Vouch copy sent!

(Jan 5, 2018 01:32 PM)Triestri Wrote: [\[CITE\]](#) How does this actually work?

This script works by rebroadcasting transactions to the blockchain which thus gets them confirmed faster. It is the same thing that everyone on this site who do "btc accelerations" does.

sm?ked - January 5, 2018, 2:59 pm

I received a vouch copy of the script. I have no association with [Ben Sharpio](#). The following review is non-biased.

My website using this script can be found here:

[Click](#)

or

www.weaccelerate.us

Setup: 10/10 - Completely being honest here, I have no coding knowledge what-so-ever. I was able to set this up in maybe 30 minutes max. All you need is to upload and unzip the file in your public_html. Otherwise the rest of the setup is completely straight forward. He gives you a README.txt with literally everything you could want to edit other than personal changes. It couldn't be easier to set this up. Keep in mind, I HAVE NO CODING KNOWLEDGE. Hosting and a web-domain added up to a total of \$5.76. Pretty cool, huh.

Usage: 9/10 From a user's point of view, its literally so easy a 10 year old could do it. All they need to do is enter the txid and click a button. The website looks good and is well designed. Color theme is smooth and can easily be changed more than likely. Like I said earlier, anyone can do this. You can change the text and everything obviously, pretty well done already so I don't really see a point. The box that pops up after submitting a transaction is smooth and pleasing. Very well made.

Functionality: 10/10 - It worked on my small btc transaction, went pretty quickly too. Here is a transaction I just rebroadcasted

<https://blockchain.info/tx/e0fa67c92c8be4c6f05b7e319962941dffbc7119156267a2efb2d0628675dfd5>

Watch to see how long it takes.

Overall: 9.5/10 - Very good for what you pay, easy to setup, good for personal or commercial usage, well coded. I would suggest this.

Cadent - January 5, 2018, 3:20 pm

Your script bounces back my transactions as already confirmed when it isn't. Mind helping?

Ben Shapiro - January 5, 2018, 4:32 pm

(Jan 5, 2018 05:15 PM)Ariaa Wrote: [\[CITE\]](#) Your script bounces back my transactions as already confirmed when it isn't. Mind helping?

You haven't bought the script and I don't have a site currently setup where you can use such script.

If you are talking about BitcoinHatch.com it uses a previous version and is not up-to-date as of now.

Please PM me with more info as I am sorta confused.

Ariaa - January 5, 2018, 4:33 pm

Ben Shapiro - January 5, 2018, 4:43 pm

(Jan 5, 2018 05:42 PM)Ariaa Wrote: [\[CITE\]](#) Same outcome
Please PM the transaction link!

EDIT: Found out that his TX is returning already confirmed because he has previously rebroadcasted it using another service. It can only be done once across the board.

Light - January 5, 2018, 5:07 pm

Could I get a vouch copy.

Ben Shapiro - January 5, 2018, 5:08 pm

(Jan 5, 2018 06:07 PM)Productivity Wrote: [\[CITE\]](#) Could I get a vouch copy.

Sorry Productivity, the only vouch has been given and you can find his review on the first page of the thread. You are welcome to purchase though, you won't regret it:)

Elitas - January 5, 2018, 5:15 pm

I got some PP I need to get rid of/exchanged so why not.

Few questions:

1. What kind of server-side scripts are needed? [FOUND FROM REVIEW]
2. What is your current costs for hosting a website like this (per month)? [FOUND FROM REVIEW]
3. What other costs would have to be paid apart from domain/hosting? [FOUND FROM REVIEW]

I'd like to see another site hosting this script. Does it require a MySQL database at all or PHP?
Which PHP versions?

If it's just JS/HTML/CSS what stops people from hijacking the script and running it themselves?
(Not that I'd do that to you, but if I bought it I think people might steal the script and make their own sites, thus devaluing it and it could be possibly leaked).

Ben Shapiro - January 5, 2018, 5:18 pm

2. What is your current costs for hosting a website like this (per month)?
3. What other costs would have to be paid apart from domain/hosting?
3. Can we see a live demo/site you own running the same script?
 1. Its a really simple script powered by ajax. You literally need nothing else other than what I provide you
 2. I'm a pleb who has just go into making sites and such so I use godaddy and pay 7.99 a month but if you go with a service on here you could easily get that down to a few dollars per month
 3. NONE
 4. I currently am in a hate-hate relationship with godaddy and so I'm in the process of getting a refund from them so I'm in no position to update my site with them lol BUT another user has gotten a copy of this exact script and created a site, check it out here: weaccelerate.us (credit lads).

If you have any other questions, or want to buy PM me :)

EDIT: Yes there is some PHP, no MySQL. It's very simple and people cannot hijack it!

sm?ked - January 5, 2018, 5:25 pm

(Jan 7, 2018 02:34 PM)??????? Wrote: [\[CITE\]](#) whoever made that site is trash. fucking bullshit to request users computing power for mining, especially for such a lightweight and cheap service. Yeah idk why he brought that one up it's like the most aids site possible.

Everyone else; Still selling!!!

synboxin - January 7, 2018, 2:42 pm

So it's basically \$20 for the send.php but you could just find someone else with the site and use theirs? Or am I missing something else lol.

Ben Shapiro - January 7, 2018, 2:47 pm

(Jan 7, 2018 03:42 PM)synboxin Wrote: [\[CITE\]](#) So it's basically \$20 for the send.php but you could just find someone else with the site and use theirs? Or am I missing something else lol.

Nah you get a complete site setup. Even the rebroadcast script is custom compared to the public version. You won't be able to find the whole shabang for \$20 or under other than here.

This obviously isn't made for coders who can create it themselves... Even then it's cheap and saves a good amount of time and trial and error

Hoxus - January 7, 2018, 3:55 pm

how it acclerate transaction ? when it send the tx ?
demo ?

SIMILAR but not the same. The backend script is more efficient and the front end is way simpler to fix and customize. That ones code looks like garbage and I've scene many complaints that if more than one user tries to rebroadcast at the same time it breaks and wont rebroadcast any of them.

Hoxus - January 7, 2018, 4:06 pm

(Jan 7, 2018 05:04 PM)Ben Shapiro Wrote: [\[CITE\]](#) SIMILAR but not the same. The backend script is more efficient and the front end is way simpler to fix and customize.
