Thread: [Mass Youtube Bot v1.5](#)

ThatAlbinoFrog - January 6, 2018, 7:32 pm

Ayy Guys

Over the passed week I've been working on a youtube comment bot, which slowly turned into an all around youtube mass bot. Coded it in vb.net 4.0 and works pretty well.

v1.1

- Added like video function
- Added random delay to bypass spam filter

v1.2

- Fixed crash when videos were removed or comments were disabled

v1.3

- Fixed comments not working when Web browser is hidden
- Added Like / Dislike function
- Added Subscribe function

v1.4

- Added option to comment or not
- Changed layout slightly
- Now an all around youtube bot

v1.5

- Added settings button instead of all the checkboxes
- Added licensing system
- Added Simple video scraper (can only scrape 20 videos at a time)

v1.6

- Multiple Account Use! (Import emails and passwords from text files)
- Slightly more efficient code
- Layout Changed

v1.7

- Now import accounts from combo textfile (USERNAME:PASSWORD)

Next Feature - Better scraper

Cheers

Getting passed the youtube spam filter isn't too hard. I've gained 35 subs and I've only used it three times. Just think outside the box ;)

Does your software use requests?

Nah not yet, I'm aware they are much better so I might try use those if I update it. I'm pretty new to coding so I'm still learning all this.

Waste of time post more then one comment and youtube marks it as spam.

It seemed to work fine when I was using it? Do you mean 1 comment on multiple videos or multiple comments on one
