Thread: [Vitani 1999047 && The Unknown Coder 292915 Multi vouch, ban evasion, scummy marketing](#)

Friedrich Nietzsche - January 7, 2018, 10:53 am

Users in question:

The Unknown Coder <https://hackforums.net/member.php?action=profile&uid=3292915>

MARVID: <https://hackforums.net/member.php?action=profile&uid=238542>

Vitani: <https://hackforums.net/member.php?action=profile&uid=1999047>

Allegations: The Unknown Coder is MARVID and is a multi accounter. Vitani supports this, fully knowing that The Unknown Coder is a multi accounter because The Unknown Coder is the coder of Spartan Crypter. The Unknown Coder then proceeds to deny association with the crypter and shills for it as well as multivouching.

First allegation: MARVID is the programmer behind Spartan Crypter.

Evidence #1: Thread Title.

Spoiler ([Click to View](#))

Spartan Crypter's thread title: Best | Spartan Crypter | Coded in C++ | Supports .NET | RT & ST | FUD 08/18/2017

Buzz Crypters (ran and coded by MARVID) thread title: \$15 | FUD 4/23/16 | Buzz Crypter | Coded in C++ | Supports .NET | RT & ST | | 30KB Stub

It is hard to believe that products not associated with each other would have such similarities.

Evidence #2: Very similar stub size claim and programming language claim.

Spoiler ([Click to View](#))

Both products claim to be developed in C++ and has a stub size of around 30kb. Funny thing however that currently the stub size of Spartan is nowhere near that but rather is around 800kb ["Right now the stub size is 34.6kb"](#) and the title of the Buzz Crypter thread.

Evidence #3: Technical similarities

Spoiler ([Click to View](#))

Absolute Crypter claims that ["Stubs are currently using a Delphi as the wrapper for the C++ shellcode, stubs will change back to strictly C++ again soon."](#)

The same applies to Spartan Crypter.

Evidence #4: Vitani and his lie regarding who coded Spartan Crypter.

Spoiler ([Click to View](#))

Vitani claims that he is the programmer behind Spartan Crypter and is only helped by The Unknown Coder. This claim is false.

First of all, looking at Vitani and his past works we can clearly see that he is in no manner capable of developing this crypter, even with immense help from others.

[Spartan Scanner](#) is a project he started shortly after the launch of Spartan Crypter. Let's look at the decompiled code to see how good at programming Vitani is.

An individual who can't understand basic concepts such as switches would have no chance of developing a crypter like Spartan using the Qt framework.

In addition, Vitani truly is the developer and full owner he would have his own thread title at least wouldn't you agree?

Second allegation: The Unknown Coder is the same individual as MARVID.

Evidence #1: Very similar political and religious views

Spoiler ([Click to View](#))

First of all, their political views and affiliations are very much similar. Both are very much right winged and supports Trump as the POTUS, as shown by the following threads.

<https://hackforums.net/showthread.php?tid=5240205>

<https://hackforums.net/showthread.php?tid=5529412>

While inconclusive in nature, combined with evidence #5 and other evidences this leads to the inevitable conclusion that they are the same person.

Evidence #2: HF activities and drug usage

Spoiler ([Click to View](#))

Second, both are active primarily in the SRPP and Cryptography Market section. Interestingly The Unknown Coder has less post in CEM than in SRPP, which is due to Vitani now being the seller of his product. This can be seen in their post activity pages.

We also see that the 2 accounts are both members of the Vices section, with The Unknown Coder having 22 posts and MARVID having 38. I wonder what drugs they use?

<https://hackforums.net/showthread.php?tid=5212976&pid=50304951#pid50304951>

<https://hackforums.net/showthread.php?tid=5592352&pid=54516867#pid54516867>

Of course, both of them vapes.

Evidence #3: The Unknown Coder is the coder behind Spartan Crypter.

Spoiler ([Click to View](#))

The Unknown Coder is the programmer behind Spartan Crypter. Vitani effectively admitted this in the jabber conversation here:

Do note that this image was uploaded 2 months ago and Vitani himself acknowledged that this conversation did happen. If this link goes down due to Vitani reporting, the main imgur URL was archived and could be viewed [here](#).

Vitani tried to play this off by asserting that he "played dumb in order to try and understand what you are all about." This is false, as if he truly did not know he would inquire me about who I am talking about or seek to prove my allegations false. Instead he asserted that I should not be "obsessed about being right" and that I should "leave thing as it is".

Having previously established already that Spartan Crypter is coded by MARVID, this effectively leads us to conclude that The Unknown Coder is the same person as MARVID.

In addition, [The Unknown Coder seems to know quite a lot about the licensing and protecting system used by Spartan](#). Interesting, isn't it?

Third allegation: The Unknown Coder shills for Spartan Crypter, multivouches and claims that he is not associated with the product.

Evidence #1: Blatantly lying about his association with the crypter

<https://hackforums.net/showthread.php?tid=5655980&pid=55217343#pid55217343>

As to quote the man himself, "Am I selling a product here? Omg"

Evidence #2: Off-thread shillings:

<https://hackforums.net/showthread.php?tid=5655980&pid=55211964#pid55211964>

And many others. As the search function of HF isn't working too well I can't dig up everything but it is a fact that this user shills for Spartan Crypter.

Evidence #3: Multivouching

Here are just some of the many vouches that were made. Even disregarding everything above, this is a bannable offense.

<https://hackforums.net/showthread.php?tid=5421240&pid=52905919#pid52905919>

<https://hackforums.net/showthread.php?tid=5421240&pid=53001714#pid53001714>

<https://hackforums.net/showthread.php?tid=5421240&pid=53602694#pid53602694>

Or for your convenience, [all of his posts on the thread](#).

Would a normal user vouch this many times? I highly doubt it.

Fourth allegation: Vitani openly supports The Unknown Coder and his multiaccounting activities

This is rather obvious. One needs to look no further than the first page of The Unknown Coders' reputation page to see that the second person to rep this individual is Vitani himself, stating "Nice to see you finally joined. Welcome to HF bro"

In addition, Vitani added The Unknown Coder to Notorious. I didn't see any applications on all 3 recruitment threads however, strange ain't it?

<https://hackforums.net/showthread.php?tid=5469533>

<https://hackforums.net/showthread.php?tid=5571267>

<https://hackforums.net/showthread.php?tid=5673963&highlight=Notorious>

<https://hackforums.net/showthread.php?tid=5610153&highlight=Notorious>

I invite all to look at the evidences and come to their own conclusions. Thank you for taking the time to read the thread.

nicksaban1 - January 7, 2018, 11:04 am

Looking at the thread/ sections of both, they do look VERY similar.

Mr. Reviewer - January 7, 2018, 11:06 am

I always knew Vitani it's a bit shady, considering one of his friends scammed me in the past.

Legit CA.

Exposed ? Can't believe he uses nested ifs

The Unknown Coder - January 7, 2018, 11:26 am

"First allegation: MARVID is the programmer behind Spartan Crypter."

How does that make any sense. Have you seen the thread titles almost all them are the same.

"Second allegation: The Unknown Coder is the same individual as MARVID."

So because I vape and smoke pot I am that kid? What was it like what was 90% of the population that does pot. I am just laughing.

My religious views are valid, to have just as many people share it, because one more person shares my beliefs somehow I am him? Yes we are all brothers in Christ doesn't mean that I am him tho or anyone for that matter thats a Christian.

I known Vitani before I joined HF, he is the one who told me to join. I purchased spartan twice then he decided to give it for free after. He is welcome to post my payment proof if he decides to do so. Reason why I help the thread a lot is because I get it for free since I am close friends with him no one is making do it no one is asking to do it. Also from time he had some questions and I helped the kid specifically regarding which protector to use and what not.

This proves absolutely nothing and you know it. Feel free to ask staff to check my account and end the nonsense of the this thread.

I don't know your problem with Vitani but I don't really give a shit about it , so don't include me in it.

I agree, such is not conclusive. However pile enough together (and combine them with the conclusive fact that you are the coder) shows us who you really are.

I can fabricate a shit ton of stuff just like you fabricated this thread. While me and the kid are similar in our beliefs and use of pot thats where your "proof" ends which is none at all.

Well there goes my quiet Sunday night. Here's my reply to your thread.

It is hard to believe that products not associated with each other would have such similarities. Similar thread titles. I'd say that's definite proof that Spartan Crypter and about 50 other products on here are all ran by one guy.

And I do not support Codefusers' activities in any manner, I am aware that he makes new account occasionally and post on HF but those accounts get banned within a day or two so no point in reporting them. On the other hand you and your buddy MARVID here makes money by lying and multivouching so that's a whole different story.

Nice strawman, there are many C++ crypters around but so far only 2, yours and MARVID that utilises this technique. Don't forget the thread title and HWID policy, the amount of similarities are too much to be a coincidence.

Yes, I did get into notorious without applying, as previously said I am friends with vitani he made join HF. I am sure it is not the first time where a group leader accepts one his buddies. Somehow this proofs what according to you?

If you really think Vitani is not the coder of his product. Why don't you start by exposing his crypter that would be the logical thing to do instead of attacking me, actually proof its copy and paste instead of just saying it is. Actually proof I am the kid you spoke off instead of just posting my beliefs and my use of pot.

Yes, I did get into notorious without applying, as previously said I am friends with vitani he made join HF. I am sure it is not the first time where a group leader accepts one his buddies. Somehow this proofs what according to you? Yup, in combination with evidence that you are a multi accounter it shows how Vitani supports multis which is a violation of HF policies.

(Jan 7, 2018 01:46 PM)The Unknown Coder Wrote: [\[CITE\]](#) If you really think Vitani is not the coder of his product. Why don't you start by exposing his crypter that would be the logical thing to do instead of attacking. Actually proof its copy and paste instead of just saying it is. Actually proof I am the kid you spoke off instead of just post my beliefs and use of pot. I never asserted that the crypter is copy pasted, however I do claim that you are the coder and you are a ban evader. Proofs were

provided already, don't forget Vitani actually admitted this to me on jabber.

The Unknown Coder - January 7, 2018, 12:58 pm

"Vitani admitted that you are the coder to me on jabber, as shown already, and evidence that MARVID is the coder is also displayed. You can't prove otherwise, you just make up random hypothetical scenario laffff."

You mean him trolling you replying meme is proof I am the coder behind the crypter or a multi? Okay. I'll let staff deal with this. I have nothing to hide.

"Same HWID lock system, same policy, same everything pretty much. Sure seems like you, MARVID, are behind this crypter to me."

There was a crypter I bought a while back called star crypter that also uses that HWID protection or used to use it. Am I the coder for that crypter to? It was really similar to spartan btw? Like listen to your logic.

"I never asserted that the crypter is copy pasted, however I do claim that you are the coder and you are a ban evader."

You can claim all you want but you haven't proven anything, if anything you proved that Vitani tends to favor me.

Already disproved in the initial post.

Kinda funny how you moved the goalpost from "playing dumb in order to try and understand what you are all about" (as to quote Vitani himself) to trolling me as well, your arguments are laughable.

Who knows, never looked at Star Crypter before. If the builder and a license is given then it can be proven quite easily.

Also did Star Crypter have a shill who is just like MARVID? Because Spartan seems to have one.

Vitani - January 7, 2018, 1:08 pm

Sigh. And again there you go with the assumptions. This will be the last reply I make to this thread since it's utter nonsense.

If what you say is true, do you really think I would be forced to use the exact same thread title? Yes the thread titles are similar. If you spend about 30 seconds in the marketplace you'll see a whole lot of the same.

(Jan 7, 2018 01:25 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Strange it is indeed since this technique is rarely used, and only 2 crypters uses it and one is the crypter developed by MARVID and the other is the one you sell. Both crypters started out as pure C++ and then later on added a delphi wrapper a bit in, isn't it weird how similar everything is?

Wrong. There are other crypters out there are doing the same.

(Jan 7, 2018 01:25 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) So you acknowledge that you can't even completely code something that basic either but had to copy paste. Oh good, more assumptions. For your benefit I'll explain it one more time. I found a code, thought it would be nice to make it work again which I did. Because at the time Spartan Crypter was launched, your current account is only 10 days old and would certainly not be reputable enough to achieve as much sales as Vitani would be able to get.

And yes you certainly are MARVID, the coder of Spartan. And of course you don't care since if you ever need a crypt you can always make your own stub instead of using the one that all your customers use which are generally FUD for a few hours only.

I am tired of you lying that vitani said I was coder vitani never said or admitted to shit. All that picture shows is him trolling you. I have yet to see from vitani that he said I or anyone else was the coder for the matter.

"OK and how is this relevant? Someone who is linked to you disappearing around the time you popped up is pretty suspicious to me, and I believe that most would agree."

Difference being he was still here even after I popped up? Guess everyone who signed up on my date is a suspect of your nonsense.

"Being online doesn't mean he was active, anyone can accidentally open the wrong firefox profile and open the wrong HF account."

Then staff can obviously check if I am telling the truth or not with my ip...

"beauty about your method of argument is that no proofs are proofs, even you admitting it is excused because you were apparently jesting even though the conversation happened months before anything started and you clearly were anything but jesting."

The beauty of this argument is that it is your opinion and by definition is not correct. You admitted to there being no proof.

Also, pming any staff member with actual proof that someone is a multi will get that person banned so I don't why you act like staff doesn't enforce its rules. I myself reported a mutli once they got banned. The only difference is that you don't have proof you just have your opinion about simple as that.

I am done, replying. Eventually staff will see this nothing is happen I will leave you with your opinion. Going to the movies.

Having someone vouch for your product is not a violation. Shilling would be creating a bunch of accounts and then say bought this can confirm awesome etc etc and then sales trashing others. Also so what if the guy that made it has multiple account that has nothing to do with him. Lets say my friend Bob Ross is letting me resell his artwork. Bob Ross also likes to dress up as a women and use the womens bathroom. Yes that might look funny. But in the end of the day his actions are his actions and my actions are my actions. I can still sell Bob Ross's art work people might just think it's funny I do business with a creep. Then again it is 2018.

Yes because any time you slip and reveal something you are simply just trolling. Nice escape hatch bro.

Oh come on, are you even trying? IPs doesn't prove shit because anyone can use a proxy. And yeah, he disappeared shortly after you joined and spartan crypter starts.

Proof is offsite and is generally not accepted by staff. Why don't you use your brain for once for once? I've been on HF a tiny portion of time compared to you yet I already know that offsite proofs are not accepted generally for various reasons.

You and your pyrrhonism are ridiculous.

Wrong.

The Unknown Coder vouched over 6 times on the thread. It is a violation of HF policy.

Oh Noe! Thread bumping. So tell a staff member and have them give the user a warning. You are making it seem like it's the end of the world.

Didn't see something like this coming from Vitani.. At the same time it's only to be expected these days. I'll take the massive pile of coincidental evedince over the claims that deny it.

Good find.

Not here for long but the more rep+authority a person has the higher the corruption

my 2 cents..

Rep is just a number to give people on a forum an ego. Everyone knows that.

I did not use that argument to show that The Unknown Coder is a multi accounter, however when Vitani does it knowing that The Unknown Coder is a multi accounter it is a policy violation.

Imao the drama in this thread.... just let it go Friedrich

I never hold sides but I spoke with Vitani few months ago he's a honest guy and he tells the truth, Maybe that Unknown Coder guy might be multi but I'm certainly sure if vitani says he isn't the coder he truly isn't.

I really don't know what more to say since you both are honest guys.

such a nonsense thread, full of lies.

Friedrich Nietzsche you are like the north korea of HF.

you have been ddosing spartan crypter's website for weeks and right after vitani exposes you for your foolish childish behaviour you try to set him up with fake evidence and put him in the bad spotlight.

shame on you Friedrich Nietzsche, really this is very low.

You make assertions that claim that I am lying, yet you failed to disprove it.

You compare me to North Korea, while I have yet to lied a single time in this thread, nor did I fabricate any of the evidences.

Your assertions regarding my character does nothing to affect the propositions and assertions that I made, which unlike you I backed up with evidences which remains public and easily accessible to all.

In The Dawn of Day, there is a quote that refers to those like you: "Warum sieht der Mensch die Dinge nicht? Er steht selber im Wege: er verdeckt die Dinge."

Or loosely translated in English, "Why does man not see things? He stands in his own way: he conceals things."

Perhaps if you take a more objective look instead of being biased considering you are a moderator in Spartan's support chat your opinion might change. Of course, that is not to be expected.

And did I ever deny anything Vitani asserted, other than his statement that I sales trashed or have anything against Maxim (which I do not)?

And yes, of course you do regret posting here considering your partisan was shown.
