Looking for this also, I did have a copy but unfortunately lost it after I wiped my hard drive. There's several user:pass combolists online but I'm looking for the 33m email, md5, sha1, username, ip leak like the original poster.

Cross-reference with other databases, attempt to dehash uncracked hashes, do you perchance have proprietorship of the database in question?

Okay, I managed to find the db looks like I won't be needing this site anymore.
