There is a great amount of information put into this book which tells me that the author and editor put in a lot of work to make this presentable, understandable and readable for the buyers.

I'd give the rating at a 10/10 since it'll be helpful to those who have passion to create a YouTube but are unsure of where to start. Nonetheless, great book, a lot of information and if OP offers support and can answer questions, then that's another plus.

(Jan 10, 2018 07:26 AM)Theocritus Wrote: [\[CITE\]](#) This E-Book is longer than most, consisting of over 25 pages, most of whom are stacked full of information and tips.

Most of these pages also have text from top till bottom, making it a very large amount of info shared overall.

This E-Book will teach you step by step how to go about slowly growing your channel, audience, how to expand to different platforms of communication, and in the end also how to make money off it.

There is so much information in this E-Book i was honestly surprised.
The steps are laid out nicely, and the E-Book is well organized overall.

Having personally made many a Youtube channel in my day, and had both successes and flops, i can say i agree with the majority of things in this E-Book.

As the E-Book mentions itself, you will have to use lots of effort as well as time, to eventually get a

following and being able to profit from it.

There is nothing negative to really say about this guide.
Grammar is overall perfect, information is on point and accurate.

This E-Book is prop full of useful information on how to successfully grow your Youtube channel and achieving success.

And at the current price, I would say anyone interested in starting up on Youtube should take a look at it ?

Got a Vouch Copy from OP, and here is my review:

This E-Book is longer than most, consisting of over 25 pages, most of whom are stacked full of information and tips.

So to get into the contents of this E-Book.
As i stated it is quite long, and having read through it all i have some thoughts.
This E-Book will teach you step by step how to go about slowly growing your channel, audience, how to expand to different platforms of communication, and in the end also how to make money off it.

This is very far from any get rich fast scheme, which you should all already be well aware of by just looking at the thread above.

There is nothing negative to really say about this guide.
Grammar is overall perfect, information is on point and accurate.

The only negative thing to me personally are the walls of text.
What i mean by this is that on a decent amount of the pages, the text just keeps going and going, and to me it gets a little disorienting after a while.

My advice would be to skip over a line or two more often, to make it look more clean and less overwhelming.

But as i said, this E-Book is prop full of useful information on how to successfully grow your Youtube channel and achieving success.

And at the current price, i would say anyone interested in starting up on Youtube should take a look at it ?

For sure, I'm not tripping on it too much but curious what your opinion is.

Galaxias - January 18, 2018, 10:29 pm

Hey guys, update on the book that @OP provided to me for free. Now, there is a lot to cover in this book that I will not review too much about as that would obviously ruin the point of having to buy the book but lets get started.

Firstly, there are a total of 6 sections, one introductory, 4 main areas of focus, and conclusion of what you should have hopefully taken away by reading through the book. Now again, this book has a lot of details and will require your patience to go through and read and understand the material. Please also keep in mind that by purchasing this book, you're saying that you're willing to work for developing and growing your channel, as this will not be an easy task to do in mere days to weeks, it will take possibly a few months but with effort comes great pay in return. Again, this book will help you broaden your knowledge in the field of YouTube to give you a greater chance to actually expand your audience reach if you are able to put in work.

Now, there are 5 sections; basically main topics, that focus on five different things. The first is hardship of starting your channel, making it work and finding what type of channel that fits what you want to do. Second is building your channel with channel, getting an audience reach and more. Third is trying to figure out, who you are? What are you trying to achieve, and what are you representing? Fourth is how should you communicate with your audience? How can they be engaged with you and constantly come back to your channel? And lastly, the biggest one which would probably be of everyone's interest if purchasing this book... making \$\$\$!

There is a great amount of information put into this book which tells me that the author and editor put in a lot of work to make this presentable, understandable and readable for the buyers.

I'd honestly rate this book at an honest 8/10 due to the fact that I am pretty familiar with the content

that's

provided in here as someone who's done YouTube before, but for those who I'd recommend purchasing, I'd give the rating at a 10/10 since it'll be helpful to those who have passion to create a YouTube but are unsure of where to start. Nonetheless, great book, a lot of information and if OP offers support and can answer questions, then that's another plus.

Thanks,
Galaxias.

If you're looking to make a YouTube channel make sure to pick up this guide

Edit: I've updated the guide to fix a few weird phrasings, but it's nothing major so if you've already downloaded the guide you're not missing out on anything.

How much are you earning with your youtube account per month?

(Apr 27, 2018 03:25 AM)DunderBamse Wrote: [\[CITE\]](#) How much are you earning with your youtube account per month?

A few accounts I earn between 500-800 monthly off of ad revenue and in some cases Patreon. It can vary a lot though depending on if it's a good month and of course doing sponsored content brings in a significant bonus. My main channel however that I focus most on growing pulls me in about 4000-6000 a month in ad revenue, and about 650 a video via Patreon supporters. Again the amounts vary depending on the month and if any of the content was sponsored.

What is the most subscribers you have gotten from the ground up in one month?

(May 13, 2018 03:43 AM)jjfly Wrote: [\[CITE\]](#) What is the most subscribers you have gotten from the ground up in one month?

Starting from 0 subscribers and making sure to put effort into interacting and uploading videos to build a new channel I was able to go from 0 to 20,000 subscribers in about a month (this was a gaming channel with extremely easy to produce content, as covered in the book more uploads translates near directly to more subscribers and views). From there though things really begin to kick off as your current subscribers boost your videos enough to draw in more people even faster having a compounding effect on your channels growth.

Still using the methods in this guide to grow my own channels and I'm seeing exponential returns. If you're looking to set up a source of passive income through youtube make sure to check this guide out.
