As the title says, tired of using Coinbase and dealing with those shit heads. If anyone knows a good site for this in replace of Coinbase it would be greatly appreciated.

Why don't you like Coinbase? I can deposit/withdraw instantly without any hesitation. Fees are pretty low aswell

Recently made 2 withdrawals, one for around 200 and just below 40 bucks. Never got the 40 dollar one and they've been having acting kinda slow for me. Sometimes it's a pain to resolve issues when they occur is my main gripe with Coinbase
