ECC Speculation - 0.00000500+ in under 6 months Risk - Medium Price when

Posted - 0.00000015

ECC, or previously known as E-CurrencyCoin is a up and coming coin with features and ideas much like Siacoin (SC) it is believed that ECC is likely to be first to launch services focusing on data storage, and file sharing.

It has one lead developer, who has been inspired by ETH to voluntarily has taken on the project.

ECC has a working wallet, and functions through PoS but the only rewards are the coins destroyed from transaction fees.

The immediate focus of ECC is getting file storage working by creating the base so they can potentially add a 2nd dynamic of using the internet in a safer, more anonymous way.

ECC is decentralized, with no company backing and no ICO. Their website is being redesigned and is set to release at the end of January, and the marketing will begin. It is only traded on coinexchange.io, although ECC could be added to more exchanges very soon.

What do you guys think? I think it's worth investing a few dollars.

???? ????? - January 8, 2018, 4:41 pm

Looks promising Ill have to do more research.

SIM-1425920 - January 8, 2018, 4:44 pm

Great coin :)

10/10 recommend! New coin on the comeup

Vobz - January 8, 2018, 5:02 pm

gonna have to do some research on this

Slicid - January 8, 2018, 5:05 pm

Looking promising. Put \$40 into this :)

???? ????? - January 8, 2018, 5:09 pm

Too bad it's on only one exchange

Ducky10100 - January 8, 2018, 5:11 pm

Got into this coin at 4 sats, paid off pretty good at the moment the only issue is it is on one shitty exchange

The Godfather - January 8, 2018, 5:11 pm

TBH? I think I have a new investment strategy.

Get onto small exchanges

Look for a good coin that seems like another one or unique

Buy a shit ton

Wait till it gets on new exchanges

x20?

jesuscakes - January 8, 2018, 5:13 pm

Probably a pump and dump coin you can hit the lottery with easily at these prices.

Exactly what is going to happen, but then there is also potential after the fact. I'd rather stock up for cheap and sell off portions to ensure ROI

Chedn - January 8, 2018, 5:28 pm

May potentially be investing a few \$'s as in currently adding a few coins to my portfolio :)

What do you see this coin reaching? Do you guys plan on selling as soon as you see it on a rise or are you guys in it for the long run?

To be honest, jump into the slack, telegram, or at best post on reddit for clarification. I don't really know specifically.

It's now @ 22 stats ? Hope at least one of you got in! Still way undervalued; to me.

Rockchuck - January 8, 2018, 5:58 pm

so pissed lmao, waiting on \$600 in coinbase to become available to buy this. was planning on buy in yesterday at .002, its already .0033 and i want to die. I wanted to get this yesterday but coinbase limits are shit.

It will really take off at end of Jan in my opinion

I made a thread about it at \$0.00165 hopefully someone listened to me then!

oh yeah no doubt, especially with the website re branding. im just mad bc each .001 cent it goes up, i loose a lot of potential money.

It's more than a quick gamble ?

You should easily be able to make return of investment.

jesuscakes - January 8, 2018, 7:30 pm

In the land of privacy shitcoins I bought 223000 of this at 50sats, and now it's about to go bananas on Cryptopia: <https://coinmarketcap.com/currencies/colossuscoinxt/>

These cheap bottom of the barrel gambles do payoff sometimes.

Rumors of a signal @ 40 stats

Almonds - January 8, 2018, 10:29 pm

I'm honestly unsure whether it's a rumor or an actual signal. I heard it from word of mouth, and I think it's practical in a sense.

With that being said, don't invest what you aren't scared to lose, this is a low market cap and the market can be volatile at times. This coin has major potential at this price range, after a certain point it is unclear whether or not an investment is smart or not. You will have to determine that- I picture this coin easily reaching 500 stats in 3 months.

Current Price - 0.00000022

Sell walls @ 21 are being eaten away

Good choice! I'm doing the same- gotta stockpile before it goes up towards the end of the month, gaining momentum.

SIM-1425920 - January 11, 2018, 12:45 am

Piled on some more today (only \$50's worth)

I can really really see this taking off because of the custom address

Can't wait till end of Jan to see what their team does!

One of my friends did literally that and turned \$500 into \$50k (not as great as some members here), but he was a complete novice. Be careful though with what exchanges you use some will surely exit scam, or have a lot of issues. A lot of them are going down because people finally caught on that they exist.

It's a great way if you are desperate for short term gains, but I'd rather invest in stable coins with solid roadmaps.

Put like max \$100 into the small exchanges and work your way up, or whatever you're willing to lose your choice.

Almonds - January 12, 2018, 12:05 pm

ECC is looking up like it's ready to moon!

If you haven't got in already, look for a dip before ECC x2 by the end of the month.

TheLegendary - January 12, 2018, 1:42 pm

Spoiler [\(Click to View\)](#)

That's what's up man!

I agree with you, I think within the next day or two either we will bump up to almost 30 stats, or hold 20 + until the end of the month. That is when we will see a increase in popularity, and the price will fluctuate. I am seeing members flood into the telegram day by day, not in huge amounts, but there is consistent traction from day to day, and on top of that you can speak 1 one 1 with the developers in Slack.

Regardless, if you aren't watching ECC, I suggest you do so- this coin will be big later this year!

Slicid - January 12, 2018, 6:23 pm

I am selling it at 32 sats, then buying for when it goes down to 25 when it gets to 32.

WaffleCream - January 12, 2018, 8:19 pm

Iv been holding ECC since 2sat and have been following the development since July.

This coin is my big winner for 2018 and I recommend everyone to do some research and make an educated investment like I have.

Yes, but it is looking like ECC will be first to release file storage, and in addition, the developers are interested in other things. Watch the video of the interview with the lead dev on the thread to get more of an idea.

Fuckadoodledoo - January 13, 2018, 10:28 am

It's quite slow, but usually comes around after a few seconds- I checked it just now and it seemed to load fairly quickly.

Worst come to worst- I'll buy it for you ?

It's also listed on [Crypto-Brigde](#), as of yesterday.

Fiery - January 13, 2018, 6:01 pm

So you think this coin will go from 237 to top 30 market cap in 6 months? This coin seems extremely volatile to pump and dumps.

Slicid - January 14, 2018, 9:22 am

What is the price you see this coin being in about a year?

(Jan 14, 2018 10:22 AM)Slicid Wrote: [\[CITE\]](#) What is the price you see this coin being in about a year?

My conclusion would be pure speculation- but I could plausibly see ECC reaching 750 stats, the true growth won't be determined until we get there. There is a future for ECC, and I think the devs will prove themselves this year and bring this coin to life; It's unique to me.

shreder - January 14, 2018, 11:43 am

I have a bit of this coin I don't expect it to be the next billion dollar marketcap coin however it should net you some good gains.

Slicid - January 14, 2018, 12:32 pm

Have you tested this wallet? I'm about to invest a lot more into this.

What makes this better than Siacoin?

I have- it works pretty well. The bootstrap will sync a lot faster! I hold a majority of my ECC in the wallet.

Personally, I think ECC is better than Siacoin because the outlook of ECC is more than file storage and sharing. In addition, it is believed that ECC will be first to release file storage. Ontop of that, I think ECC is undervalued in general.

Almonds - February 1, 2018, 6:32 pm

I can't complain, nearly a week after the website release.

ECC has such healthy trends. I will hold this coin until it reaches its peak.

The new website is looking good, and the dev's are working; check slack for more details. The community surrounding ECC is growing at a steady rate, and I suggest you should do some research and look for a good buy in.
