Thread: [\[SOLVED\] Search bug?](#)

Vyxn - January 8, 2018, 11:44 pm

Good day, Hack Forums!

When I'm using the search function, a popup search box will appear. I don't use it as it doesn't give me what I want to search, instead, I click the "Advance Search"

But the problem came lately, when I search using the advance search option, it gives me a warning about 30 seconds even though, its my first search.

I know this wasn't a big deal but I still want to report to have a fix on it.

Have a nice day everyone. ?

It's because you are not upgraded and you actually use the search function every time you click "Your Thread", "Your Posts", "View New Posts", etc. So if you're not upgraded, and you click around and then right after try to search, you will have to wait.

I see. ?

I really feel stupid rn. ?
