Hi Guys,

I have investing into many cryptocurrencies and want to track how much profit/loss I'm making and graphs showing the prices. Is there anyway to do this.

Thanks, Audi

Altpocket can help you with this, yo can input when and how much you bought, same with selling.

I've had a look at this one and I think it would work quite well. don't like selecting dates as its from years ago!

If you want an app: <https://getdelta.io/>

Or if you want web-based with no bull-shit, simple and easy to use <https://myaltcoins.net/>

Delta app.

But i also suggest you make an excel sheet and just manually record all the investments you done.

Well the dates are kinda important, even if you can come close to the ballpark. Any tracker site needs the date to compare the price when you first got the coins to what the current price is.
