Thread: [Stupid python error for simple program \(permission\) HELP](#)

kone2148 - January 9, 2018, 11:05 am

Im having this problem with python , where it gives me the error:

PermissionError: [WinError 5] Access is denied: 'C:\\Users\\Daniel\\Desktop\\Patch-Keygen'

for a code as simple as :

```
import sys
import random
import os
import string
import time
```

```
os.remove('C:\\Users\\Daniel\\Desktop\\Patch-Keygen')
```

Ive also tried running it as administrator (both PyCharm and python.exe) and nothing seems to work?

Any ideas on what i should do/am doing wrong? Thanks in advance

I asume it is a folder with content you are trying to remove.

You can fix it with.

Code import shutil

```
shutil.rmtree('/folder_name')
```

<https://stackoverflow.com/questions/303200/how-do-i-remove-delete-a-folder-that-is-not-empty-with-python>
