Thread: [Selling Legitimate Bustabit Source Code](#)

JeremyBTC - January 9, 2018, 1:52 pm

Selling a legitimate copy of the source code. This is NOT a cracked or illegal version of the code. When buying this, you will not only get the code, but you will get full support, etc, and be listed under the first list here:

<https://www.bustabit.com/license.txt>

Taking offers as there is obviously only one person who can buy this.

Eh I'll throw in \$200, let's see where this goes

Edgy™ - January 24, 2018, 1:40 am

250\$

Indeed lets see :P

Since the code is open source why someone should pay to get his domain name right there?

This one is private and has a bunch of security fixes.

Are you a fake bidder or something like this ? That's what it looks like.

The version you say that is outdated have been updated like 2 months ago, thing that doesn't make it outdated.

Next time you will talk about security fixes please explain what fixes you are talking about ?

Edgy™ - January 24, 2018, 1:57 am

I don't know where you see the update?

<https://github.com/FuzzyHobbit/bustabit-webserver>

But the last update was in 2015. So nothing like 2 months ago.

I wouldn't take \$250 for this. I paid much more than that, and it's value is much higher.

It's actually pretty much done.
Thanks anyway.
