Thread: [AltCoin Forums~ Custom Theme/10 Second registry](#)

NotAPC - January 9, 2018, 11:08 pm

AltCoin Forums

Our custom theme is up but looking for bugs and feedback!

Do I have a terrible domain? I'm I to far behind on trend?

The forum will keep on topic, we will not be adding a gaming section, hacking section, until theirs a blockchain for it.[/align]

M?xim - January 9, 2018, 11:10 pm

The domain is nice. Just keep in mind that HF is sort of a crypto forum these days, to make sure not to advertise a competition forum.

NotAPC - January 9, 2018, 11:19 pm

Yah, it's definitely picking up speed on HF. I know on rules it doesnt want hacking competition sites, but plan on expanding a lot more, and don't plan on keeping this thread up forever, just until site is finally released and ready to combat its competition.

cl0wnface - January 9, 2018, 11:22 pm

Your design definitely needs work, especially the picture in the top looks pretty horrible. I'm curious how it will look once you have the new theme.

NotAPC - January 10, 2018, 12:05 pm

The design will be one of a kind. Yah most things right now are just place holders, and I'm just adding content while theme is being designed for SEO.

Been looking around on sites similar and finding problems that the forum owners are not addressing.

SORRIE - January 10, 2018, 12:11 pm

I signed up and like the idea, but ooof do you need a theme change

NotAPC - January 10, 2018, 9:25 pm

Yah that will definitely be changed, here to see feedback on other things, Think it will be fair to make members acquire more post before allowing avatars and signatures? Think it would be a better idea to be more relax? Should I only allow people with 100Post+ to post ICO announcements?

Kaz'jin - January 11, 2018, 1:22 am

I understand the passion you share for this project but I see it completely unnecessary to be posting any sort of development updates through your forum platform as of now, and rather use this thread for your main source of publicity. Other than that, I'd advise looking over your logo as it is squeezed together and does not look good.

Good luck with the forum!

FamousHater - January 11, 2018, 1:29 am

lol dude

go to the graphics section and get some major help if u want this project to go anywhere

the site looks worse then when omni first burned down hf a few months ago and we had the default myBB theme

NotAPC - January 11, 2018, 10:50 am

I will reopen when theme is in place and go from their, I appreciate the feedback!

NotAPC - February 9, 2018, 8:28 am

Our theme has been released! We need some feedback on it. What can we improve/takeway?

Skeetz - February 11, 2018, 8:26 pm

the new theme looks really good dude, good job so far.

VirtualFrost - February 12, 2018, 5:35 pm

I'm guessing there's a new theme compared to the old one? The one that I'm seeing looks amazing, love the colors. Signed up cause I'm always interested in this scene. Award icons could do with a redo, they don't fit your theme. This is a nice start and I definitely believe you should stick with it and work with some people to get this to succeed.

What size is your monitor?

Mine looks fine: <https://i.imgur.com/m56rL8Q.png>

Will be looking into this and finding a fix. Glad I'm finally getting some feedback, so I can find issues! <3

Resize your browser smaller slowly, it doesn't get any smaller because it's the font keeping it at its length. Just need it to make it so it can dynamically drop it down to another line.

NotAPC - February 14, 2018, 8:06 pm

Thanks for the input guys! I made some edits and hopefully not a big issue with how I went about it, let me know! Let me know if you see anything else! <3

Malevolent - February 14, 2018, 8:09 pm

The theme looks pretty sweet, very eye catching.

NotAPC - February 17, 2018, 12:27 am

Almost done with all the kinks! I think we are about ready for our full release! what do you think?

NotAPC - February 21, 2018, 11:43 am

Made some more fixes with the theme, I think we are almost done with all the bugs. Working on a couple unique features. And I think we will be ready to start advertising!

We need a couple of people to try and register I believe our email system is setup. We are running on a VPS as well as our email servers.

NotAPC - March 5, 2018, 7:22 pm

We have made a few more improvements! We are working on a couple of unique features and we will be ready to start on advertising!
