Thread: [Multi-accounts Gmail Trick](#)

**000** - January 11, 2018, 3:24 am

I am not sure if any of you guys are aware of this, but I felt to post it here as some of you might not be.

Here we go:

Lets say your gmail id is : [email=YourGmailID@gmail.com]YourGmailID@gmail.com[/email]

Now any mail sent to following will go in your inbox.

[email=You.r.g.m.ailid@gmail.com]You.r.g.m.ailid@gmail.com[/email] (you can use as much DOTS as you wish to and at any location within this id before @ sign)

[email=YourGmailID+321@gmail.com]YourGmailID+321@gmail.com[/email] (any number can be used between + and @)

Means your one Gmail account acts as millions of gmail accounts. This is explained better here by [Soufian](#): <https://hackforums.net/showthread.php?tid=5273573>

By the way,

You can also replace @gmail.com with @googlemail.com and with this one the dots and the numbers will still work and all emails will hit to your real gmail account.

Thanks.

Wow i have never seen this! Thanks

**CyberStrike** - January 11, 2018, 4:36 pm

hmm its filtering/sanitizing the emails as well.

**Malicious`** - January 11, 2018, 7:01 pm

Saving this thread to reply in a few hours. Found something thanks to this thread.

**PhiCoke** - January 11, 2018, 8:03 pm

Thank you for the tip, sweet to use it for trials :D

No problem. Thank you for replying. :)

oRequiem - January 12, 2018, 3:56 am

Pretty good tip, I never knew this to be completely honest. Thanks for the share, I'll keep it in mind :)

Glad to know that you find it useful. :)

Fortunate - January 12, 2018, 10:27 am

Any idea if you can do john.doe.55 instead of john.doe+55?

This helped me a lot, thanks Soufian and Avalerion.

I don't think that's possible. And glad to help, thank you for replying. :)

Handling - January 14, 2018, 12:15 pm

This is hella useful!!! !!!!!

What doesn't work?

Yuval2B - February 2, 2018, 10:40 am

If I want to register to a place, and I already did with my original mail. When I register with my mail but with dots, will it create a new account?

When I login to google store with a my mail but with dots and password for the original gmail, will it be new account?

**000** - February 2, 2018, 10:47 am

Depends on the website you're registering for. While some websites may consider it unique, other might know this and filter out the dots, making it useless.

**harlow** - February 2, 2018, 11:02 am

Well when I send an email to m.ynam.e@gmail.com for example instead of myname@gmail.com I do not recive the email..

EDIT : sorry my mistake of course it works. Thanks for sharing this is very helpful :)

**Positive** - February 2, 2018, 11:07 pm

I found this out by a customer a few weeks ago.

She showed me it when I asked for her email to add to our store email list.

You can also put + (whatever) and it will create a subfolder in your email inbox for those specific emails.

In this case, you could use whateveryouremailis+hackforums@gmail.com and it will create that folder.
