Thread: [Free FTP server that not block keylogger](#)

palermo81 - January 11, 2018, 11:17 am

Hello, I'm looking for a Keylogger that send a log through email or FTP without be blocked for abuse of term & conditions.

Since I do not want to leave my data, credit card etc ... I would like to use free services or one that do not require a phone confirmations or a method of payments.

any idea about what I could use?

I have tried Ardamax but the log was blocked from the server.

If the problem is ardamax can you suggest another solution?

Thank's

Buy your own web server, you'll have automatically your own ftp server.

^

with your own server I don't think it'll be difficult to setup FTP

It'll be easy but depends on who is the host

Awardspace should be fine
