We are a new telegram group of established traders.
My friends have been trading bitcoin and other altcoins since early 2014.
I've known these people for years, In person.
All together we are five. Two stockbrokers and three coin enthusiasts.

Here are some of our "calls" from today (or what would have been if we had a group) :

PART-60%
ION-30%
EMC-20%

It's almost guaranteed that you will make a profit with our calls, but of course, remember that trading altcoins is almost like gambling.
Especially with the liquidity of the coins.

The calls will start tomorrow at 1PM.
Most of the calls will consist of Short, Mid, and Long term.
Some calls may have only short-term gains in mind, some may only have long-term gains in mind, etc.

<https://t.me/CoinOracle>

?You may invite friends if you wish! We're trying to grow!
If possible please post in the thread so that we can keep the thread alive.
More people joining means more calls!
As always, happy trading!

FAQ

Q: There have been no signals for a while, why?

A: We could post a lot more but our calls would be less accurate if we would do so.

Q: Oh my god the market is crashing will I loose all my money if I don't get out now?

A: Keep calm. Important news will be posted here and you should never sell because you get emotional about some temporary red numbers.

Q: Oh your calls are hitting their first targets! Should I jump on the train?

A: Do not buy if you're not in the buy zone. Wait for the next call or updates about the recent calls.

Most of us are spending sleepless nights. Maybe a chat for the channel would be a good idea. To discuss calls that have been made and stuff.

What did we learn after this bloody correction??

Losses everywhere.. weak hands finally leaving the market. But wait, losses? Well WE don't consider a decreasing fiat value as a loss. Look at the exchange rate of your ALTs to BTC.

Did you really loose anything in BTC ? Is everything going sideways? No it is not. If you ignore the fiat value you end up having more BTC by the end of the day. That's the only thing that counts.

You always want to have more Bitcoins than you had before. You always go back to bitcoin if you want to book profits. You don't want Tether. You don't want Euros, Dollars and no you don't want YEN.

If you have a portfolio that's well thought and based on technical and fundamental analysis you won't be loosing anything.

What's with the fiat value? It's 2018 wake up.

?? The Oracle will protect you but you have to listen! ??

Yeah, it's good that these have been weeded out.

Speaking of WEEDDED out, loving THC, POT and DOPE rn :) Could have sold for more profits but each netted me ~.5 to ~.8 BTC each.

Glad to have you!
