Thread: [MyBB userbars | Pure CSS | Use them freely over at your forum](#)

Kaz'jin - January 14, 2018, 3:22 am

Modernized MyBB forum userbars

Check it out over @ [CodePen - Userbars for MyBB 1.8x](#)

You can use those freely for your project or your community board free of charge. They are purely made out of CSS and hopefully will suit your forum without more than minor changes to the files. I will be monitoring the demand for this kind of projects and if the demand has a gradual increase, I will be pushing more updates to the project - polishing the current userbars as well as adding new ones.

I do not guarantee any out-of-the-box experiences with this project.

Thanks for sharing, these look good. Hope to see you continue with this little project.

(Jan 14, 2018 07:57 AM)Orka Wrote: [\[CITE\]](#) Actually a clever idea, very cool share. I would compile the SASS first to save importing it into MyBB.

There's a link to a Github project for this which has a compiled version. The CodePen is purely for preview. :)
