I'm really not the best when it comes to this specific of specs, so I was hoping someone could help me

GTX 960 I found on Ebay  
Core Clock: 783 MHz  
Shader Clock: 1566 MHz  
Memory Clock: 902 MHz  
Memory Type: DDR5  
Memory Size: 4GB  
Memory Width: 128-bit  
Bus Interface: PCI-E

GTX 560 TI  
Core Clock:900 MHz  
Shader Clock: 1800 MHz  
Memory Clock: 2100 MHz  
Memory Type: DDR5  
Memory Size: 1GB  
Memory Width:256-bit  
Bus Interface: PCI-E

I plan on using this for Gaming

The 4gb vs 1gb is the thing you should look for if you're into gaming. Depending on what games you wanna run, price of each card, etc

970. I don't believe that there is any possible way that a 5 series is better.

Could be wrong though, not the most knowledgeable on the subject.

yeah like others said you can get a 970 for pretty cheap and it still performs really well @ 1080p
