Thread: [Cloudflare Firewall Blocks](#)

Omniscient - January 14, 2018, 2:13 pm

There has been some member complaints about the Cloudflare Firewall blocking the ability to make posts.

It would help me if members can force the block and contact me with the Cloudflare Ray ID from the block so I can review the rule and consider adjustments. Also if you can put the post content at Pastebin and Pm me the link that would be helpful too.

So in short PM me the following if you're CF firewall blocked during a post.

1. Cloudflare Ray ID
2. Post content pasted at Pastebin.com

Thank you.

Makaveli The Don - January 14, 2018, 2:25 pm

Hopefully people with the issue can speak up and help you do the appropriate adjustments. Good job Omni!

Nuworld - January 14, 2018, 3:06 pm

Just last night I was trying to post a tutorial in one of the groups I'm in. However the firewall kept blocking me.

Once I get back home I'll try posting it again and report back here.

Every time I make a post on my beloved Javascript Obfuscation, it blocks me. I'm not sure about the ray but... it blocks me!

It should provide you the Ray ID on the block page. Can you screenshot it and send me a PM when it does?

AsSaSs@iN - January 14, 2018, 4:50 pm

Will do this in the future. Thanks for the option to try and resolve this. I lost lots of complete threads due to it having a freak out. It'll be good to try and improve its functionality.

Nuworld - January 14, 2018, 8:19 pm

This is what i get when i try to post my tutorial in the security group.

As we can see there are no other options.

@Omni I'll send you the post in PM.
I never had this problem until yesterday.

I never had this problem until yesterday.

I may need to add something for the block page to show the CF RAY ID.

Omniscient - January 16, 2018, 4:12 pm

Made some adjustments today to hopefully smooth out some of the blocks while posting.

Same problem here. Any time I post stuff with javascript brackets it catches it, not sure if it also blocks PHP.

I have no problems with HTML/CSS code though. I'll be sure to send it your way next time, I usually just ignore posts in the Webdev section that require JS for this exact reason.

I'll try reposting my tutorial shortly.

I'll report my findings back here.

I was able to post my tutorial.
However there is a site challenge though that not a problem.

Thanks Omni. ?
