What, it's the most played game in the world atm. Most players online at the same time

1. You are advertising Discord
2. You are selling a cheat that has the exact same menu as a public Chinese cheat?

- Fixed.

The cheat was sold in china before being shutdown, owner is no longer selling there.

Did some analysis on the file provided for a vouch (coded in c++, used snowman decompiler and binary ninja to check out this file).
Infected with a bunch of garbage.

Even on initial launch of the file it had "melt" feature right away.

I understand the nature of the product could come up with some false positives but this was definitely not clean.

Here is a virustotal just to have it shared
