Hi, the crypto is booming right, ok then here i got the huge amount of crypto leads like 1.5 million leads, 100% are crypto currency users those who use the sites like bitcointalk, freebitcoin, cex.io, cloudminer.io, btc-x, bitcoin.com etc popular websites.

And i need some monero or etcher classic asap.

So i want to trade this list for crypto, i think it covers the large amount of crypto users around the world.

So this leads are very beneficial for the exchanges, affiliate marketers, and new ICO's.

So please let me know if any one is been interested to get this leads, i just fucking need some urgent money asap.

And also FYI, i also got the users data of other niches and sites to like internet marketing (yes digitalpoint, blackhatworld, seoforms like sites..), acene, gambling, forex, betting, gun owners, web hosting, seo and some other shit..

So please text me back if any one have any deal.

With best regards,
Raja.

Lol this sounds so fake. One sitting on top of these leads would make bank one way or another. And certainly wouldn't want to need 'urgent money'

Sounds like you haven't obtained these leads yourself and are probably semi-leaked.
